SAFETY

Outstanding visibility for safe driving: Bosch automotive bulbs

Satisfied customers thanks to quality service

Passenger car repair that ensures a safe arrival

Whether on the way to work, out of pure enthusiasm for cars or for travelling to the long desired holiday destination – having your own vehicle makes independence and driving for pleasure possible. However, drivers must also be able to rely on the technology in the vehicle. For satisfied customers, workshops therefore rely on Bosch's proven quality.

Passenger car parts, diagnostics and workshop services

The workshop and retail range includes high-quality spare parts, diagnostics and workshop equipment as well as special training courses and a technical hotline. Bosch thus offers a complete package to make it easier for workshops to install and remove spare parts.

Global presence

More than 17 000 associates in 150 countries and an extensive dealer network reliably ensure target-oriented workshop support and local availability of the spare parts range.

Value-based solutions

Bosch eXchange provides a high-quality alternative for value-based repairs. During this industrial remanufacturing process, replacement parts are subject to the same standards as at the production of new ones and to the same functional and quality tests. This ensures high quality and a long service life with the same warranty as for new parts.

Competence and know-how

Bosch knows the technical requirements of vehicles very well and offers innovative and reliable solutions within its after-market range.

Did you know?

Experts expect the number of registered passenger cars worldwide to grow to

1.3 billion

by 2020 – 300 million more than in 2010, when the billion mark was crossed for the first time.

Passenger car parts, diagnostics and workshop services

Bosch offers workshops a comprehensive range of high-quality spare parts as well as diagnostic solutions, workshop equipment and services. At the same time, workshops benefit from Bosch competence based on decades of experience as an original equipment supplier. This means that each part convinces with its high quality and is excellently matched to the interaction with the other technical components in the vehicle.

Gas Discharge Lamps (HID)

Bosch cabin lamps

LED Retrofit to switch from halogen to LED

Bosch LED Retrofit ensures an elegant and modern look inside the vehicle cabin. Combining both a technology with high light output and modern design, it makes switching from halogen to LED particularly easy: install it and use it, simple as that. LED Retrofit allows energy savings of up to 80% in comparison with halogen bulbs.
