

Invented for life

BOSCH

Driven by Downpours

A clear view in all weather:
Bosch wiper blades for passenger cars

Did you know?

428,000 m² of windshield

... is the windshield surface cleaned by a Bosch wiper blade throughout its average service life. It thus reliably ensures cleanliness and a clear view.

Prepared for any weather

With Bosch wiper blades

Nobody is able to change weather. Ensuring clean windshields on passenger cars, however, is very easy – using Bosch wiper blades. They provide a high degree of safety on the roads and they are available for almost any car. This puts bad weather on the sideline.

Tradition and innovation

The story of Bosch wiper-blade success started in 1926 as the first electric wiper system was launched. Many other innovations such as wipers with spoilers, Aerotwin with its patented wiper rubber technology, and Aerotwin J·E·T Blade with integrated spray nozzles continue the story to this day.

Everything from a single source for front and rear

By means of the product lines Twin as standard, Aerotwin as premium solution and Eco as a value-based standard alternative, Bosch allows workshops to meet different customer requirements in a targeted manner. In addition, Bosch provides individual solutions for a wide variety of vehicles. These include, for instance, vehicle-specific preassembled adapters.

High quality standards

Bosch wiper blades are checked thoroughly before they are added to the portfolio. In addition to the compulsory standard tests, Bosch also performs much more stringent quality tests. Only wiper blades that pass these tests are released for sale.

High performance

Bosch wiper blades are known for their high performance. They provide outstanding wiping results and are both robust and reliable.

Did you know?

500,000*

... wiping cycles are performed by a Bosch Aerotwin throughout its average service life.

*500,000 cycles according to SAE J903A

Did you know?

8,541 l

... of rainwater are removed by a Bosch wiper blade during its average service life. For drivers, this results in high safety for a very long period.

Wiper blades

Overview

Improved visibility in the long run. Bosch wiper blades always fit – in any weather, on almost any vehicle and thanks to the comprehensive range they even meet most diverse market and customer requirements.

Technological partnerships

In close cooperation with numerous vehicle manufacturers, Bosch conducts technical development work that repeatedly generates clear prospects for the future.

A suitable solution for almost any customer

Bosch wiper blades fit almost any vehicle – no matter how different individual types may be: from the latest cars to commercial vehicles and through to classic cars. This makes them a suitable solution for almost all customer requirements.

Flexible range

A customer-specific range of wiper blades for the most diverse types of vehicles and sales channels can be selected from the complete Bosch range of wiper blades.

Reliable performance, high level of safety

Bosch wiper blades are subject to tough performance and resilience tests – both at the test laboratory and on the vehicle. Many years of experience in development and production make the difference. The result is a precise fit and outstanding wiping performance.

Strong selling appeal

Starting with the eye-catching and practical packaging right through to attractive sales promotions – Bosch ensures success in wiper blade sales. Intuitive product finders help in selecting the right wiper blade while fitting instructions and videos make installation easy.

Aerotwin flat wiper blade Technology

For outstanding wiping performance, even under extreme weather conditions:

The Bosch Aerotwin flat wiper blade has patented Power Protection Plus wiper rubber technology with long-life wiper rubber formula.

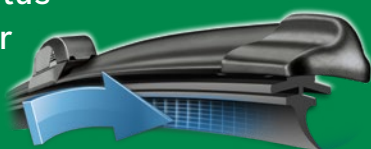

Product information

Score 3 plus points with one wipe.

Outstanding wiping performance, long service life and quiet wiping thanks to:

P.P.P Power
Protection Plus
wiper rubber

Product information

Wiper rubber with long-life formula

- Innovative wiper rubber admixture
- Improved resistance to environmental influences and debris on the windshield
- Less abrasion and wear

Long-life

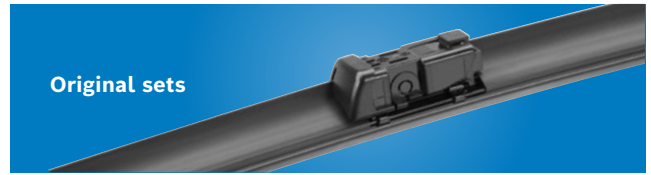

- + Evodium steel
- + Improved rubber formula

The Aerotwin range

Product lines

Aerotwin Original A, e.g. A 979 S

Original sets

- Complete range of sets individually optimized for each specific vehicle
- More than 170 part numbers with market coverage in Europe for OE types exceeding 99%
- Quick and easy fitting thanks to pre-assembled original adapter aligned with the specific passenger-car model

Aerotwin Universal AM, e.g. AM 462 S

Universal sets

- Compact range with universally matching sets for the most important OE wiper-arm types
- Range of 7 part numbers featuring market coverage in Europe exceeding 25% for OE types
- Quick and easy fitting thanks to the pre-assembled Multi-Clip adapter for the 4 most common wiper-arm types in Europe

Aerotwin Universal AP, e.g. AP 24 U

Universal singles

- Compact single range universally optimized for OE wiper-arm types thanks to its modular adapter system
- Range of 15 part numbers featuring market coverage in Europe for OE types exceeding 90%
- Always the right solution thanks to the modular adapter system: 4 adapters match the 10 most common wiper-arm types in Europe

Aerotwin Upgrade AR, e.g. AR 601 S

Upgrade range

- Compact range with universally matching sets and singles for hook-type wiper arms
- 50 part numbers featuring market coverage in Europe for hook-type wiper arms exceeding 99%
- Quick and easy fitting thanks to the pre-assembled adapter

Aerotwin Original A flat wiper blade

Product details

For outstanding performance, even under extreme weather conditions:

The Bosch Aerotwin Original A flat wiper blade has patented Power Protection Plus technology with long-life wiper rubber formula and includes a pre-assembled, vehicle-specific original adapter for the replacement of original equipment wiper blades.

Advantages at a glance

- **Outstanding wiping performance and quiet wiping under extreme weather conditions:** Power Protection Plus wiper rubber and patented coating
- **Increased service life:** long-life wiper rubber formula with innovative additive to the wiper rubber and Evodium steel spring strips
- **Outstanding wiping performance and clear view:** tailor-made high-tech Evodium spring strips lead to an increased contact pressure
- **Improved winter performance:** designed to prevent ice build-up
- **No vibrations and lifting of the wiper at high speed:** asymmetric spoiler with aerodynamic design
- **Quick and easy installation when replacing original equipment wiper blades:** pre-assembled vehicle-specific original adapter

Aerotwin Universal AM flat wiper blade

Product details

For outstanding performance, even under extreme weather conditions:

The Bosch Aerotwin Universal AM flat wiper blade has patented Power Protection Plus wiper rubber technology with long-life wiper rubber formula and includes a pre-mounted multi-clip adapter (for four different connection types) when replacing original flat wiper blades.

Advantages at a glance

- **Outstanding wiping performance and quiet wiping under extreme weather conditions:** Power Protection Plus wiper rubber and patented coating
- **Increased service life:** long-life wiper rubber formula with innovative additive to the wiper rubber and Evodium steel spring strips
- **Outstanding wiping performance and clear view:** tailor-made high-tech Evodium spring strips lead to an increased contact pressure
- **Improved winter performance:** designed to prevent ice build-up
- **No vibrations and lifting of the wiper at high speed:** asymmetric spoiler with aerodynamic design
- **Quick and easy installation when replacing original flat wiper blades:** pre-mounted multi-clip adapter

Aerotwin Universal AP flat wiper blade

Product details

For outstanding performance, even under extreme weather conditions:

The Bosch Aerotwin Universal AP flat wiper blade has patented Power Protection Plus technology with long-life wiper rubber formula and includes an innovative modular adapter system, for the replacement of original equipment wiper blades.

Advantages at a glance

- **Outstanding wiping performance and quiet wiping under extreme weather conditions:** Power Protection Plus wiper rubber and patented coating
- **Increased service life:** long-life wiper rubber formula with innovative additive to the wiper rubber and Evodium steel spring strips
- **No vibrations and lifting of the wiper:** symetric spoiler with aerodynamic design
- **Improved winter performance:** designed to prevent ice build-up
- **Outstanding wiping performance and clear view:** tailor-made high-tech Evodium spring strips lead to an increased contact pressure
- **Easy match with a wide range of vehicle types:** modular adapter system

Aerotwin Universal AP flat wiper blade

Product details

For outstanding performance, even under extreme weather conditions:

The Bosch Aerotwin Universal AP flat wiper blade has patented Power Protection Plus technology with long-life wiper rubber formula. It also includes an innovative modular adapter system that has been universally optimized to replace original equipment wiper-arm types.

Advantages at a glance

- **Outstanding wiping performance and quiet wiping under extreme weather conditions:** Power Protection Plus wiper rubber and patented coating
- **Increased service life:** long-life wiper rubber formula with innovative additive to the wiper rubber and Evodium steel spring strips
- **No vibrations and lifting of the wiper:** symetric spoiler with aerodynamic design
- **Improved winter performance:** designed to prevent ice build-up
- **Outstanding wiping performance and clear view:** tailor-made high-tech Evodium spring strips lead to an increased contact pressure
- **Easy match with a wide range of vehicle types:** modular adapter system

Aerotwin Upgrade AR flat wiper blade

Product details

For outstanding performance, even under extreme weather conditions:

The Bosch Aerotwin Upgrade AR flat wiper blade has patented Power Protection Plus technology with long-life wiper rubber formula and includes a pre-mounted adapter for older vehicles with hook-type wiper arms.

Advantages at a glance

- **Outstanding wiping performance and quiet wiping under extreme weather conditions:** Power Protection Plus wiper rubber and patented coating
- **Increased service life:** long-life wiper rubber formula with innovative additive to the wiper rubber and Evodium steel spring strips
- **Improved winter performance:** designed to prevent ice build-up
- **Outstanding wiping performance and clear view:** tailor-made high-tech Evodium spring strips lead to an increased contact pressure
- **No vibrations and lifting of the wiper:** aerodynamic design
- **Easy installation and switching from conventional and hybrid wiper blades to flat wiper blades:** pre-mounted adapter for vehicles with hook-type wiper arms

Aerotwin Upgrade AR flat wiper blade

Product details

For outstanding performance, even under extreme weather conditions:

The Bosch Aerotwin Upgrade AR flat wiper blade has patented Power Protection Plus technology with long-life wiper rubber formula and includes a pre-mounted adapter for older vehicles with hook-type wiper arms.

Advantages at a glance

- **Outstanding wiping performance and quiet wiping under extreme weather conditions:** Power Protection Plus wiper rubber and patented coating
- **Increased service life:** long-life wiper rubber formula with innovative additive to the wiper rubber and Evodium steel spring strips
- **Improved winter performance:** designed to prevent ice build-up
- **Outstanding wiping performance and clear view:** tailor-made high-tech Evodium spring strips lead to an increased contact pressure
- **No vibrations and lifting of the wiper:** aerodynamic design
- **Easy installation and switching from conventional and hybrid wiper blades to flat wiper blades:** pre-mounted adapter for vehicles with hook-type wiper arms

Aerofit flat wiper blade

Product details

Developed for improved visibility and effective wiping performance:

The Bosch Aerofit flat wiper blade has a smooth-glide coating and comes with a pre-assembled adapter for quick installation.

Advantages at a glance

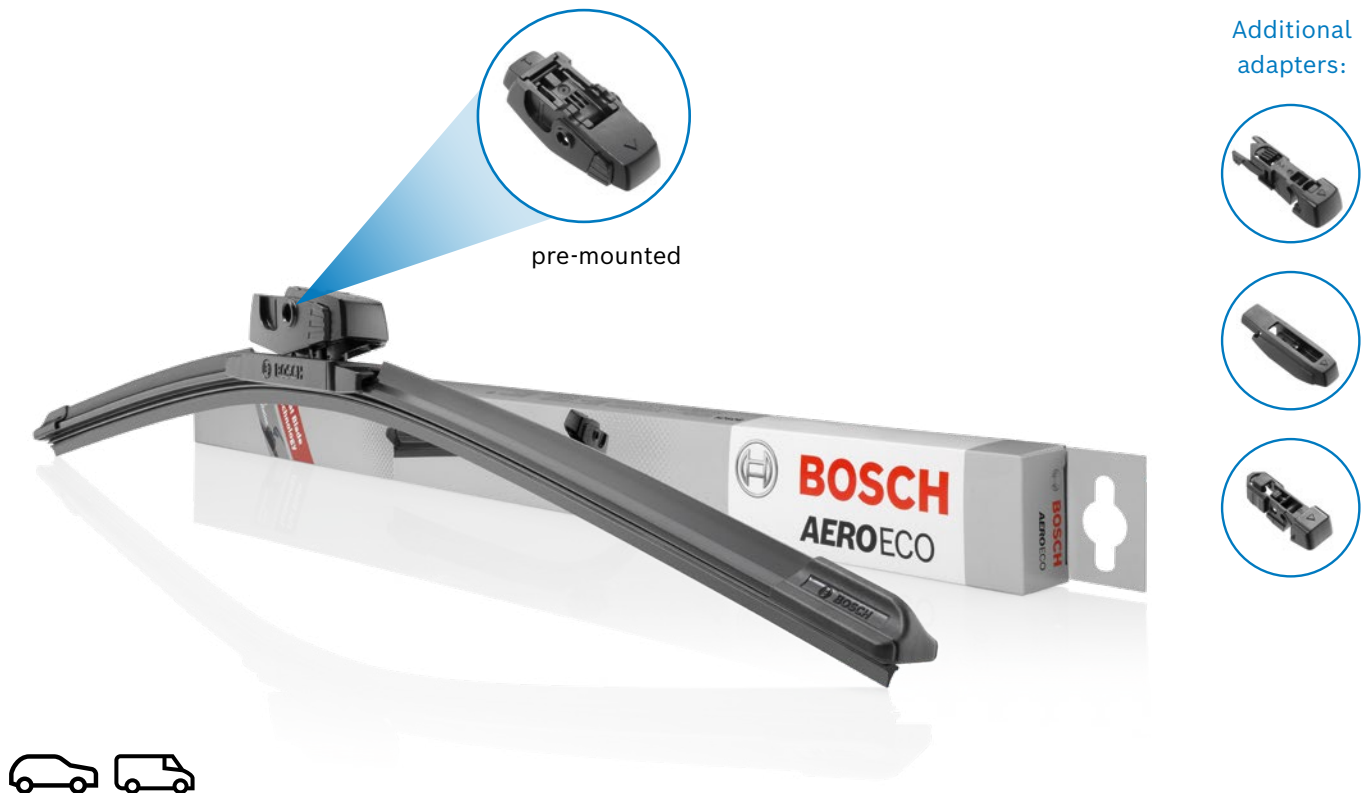

- **For very good cleaning and an even smoother action:** wiper rubber with smooth-glide coating
- **For a consistent clean and a clear view:** high-tech spring strip evenly distributes the contact pressure across the windshield
- **Stops lifting and vibrations through reduced windage for improved driver comfort:** aerodynamic design with symmetric spoiler
- **Quick and easy installation:** pre-assembled adapter: enables quick and easy installation on original equipment- and hook-type wiper arms
- **Economic solution for older vehicles and small cars:** suitable for all common types of wiper arms

AeroEco flat wiper blade

Product details

Designed for clear visibility and improved driver comfort:

The Bosch AeroEco flat wiper blade has a natural rubber wiper with graphite coating and is suitable for all common wiper-arm types, including older vehicles when using a separate adapter.

Advantages at a glance

- **For thorough cleaning and a smooth action:** natural wiper rubber with graphite coating
- **For a consistent clean and a clear view:** universally bent pring strip evenly distributes contact pressure across the windshield
- **Improved driver comfort and better performance at higher speeds:** aerodynamic design with symmetric spoiler prevents lifting and vibrations through reduced windage

Product information

The program covers a large vehicle population in Europe

– with only 4 adapters.

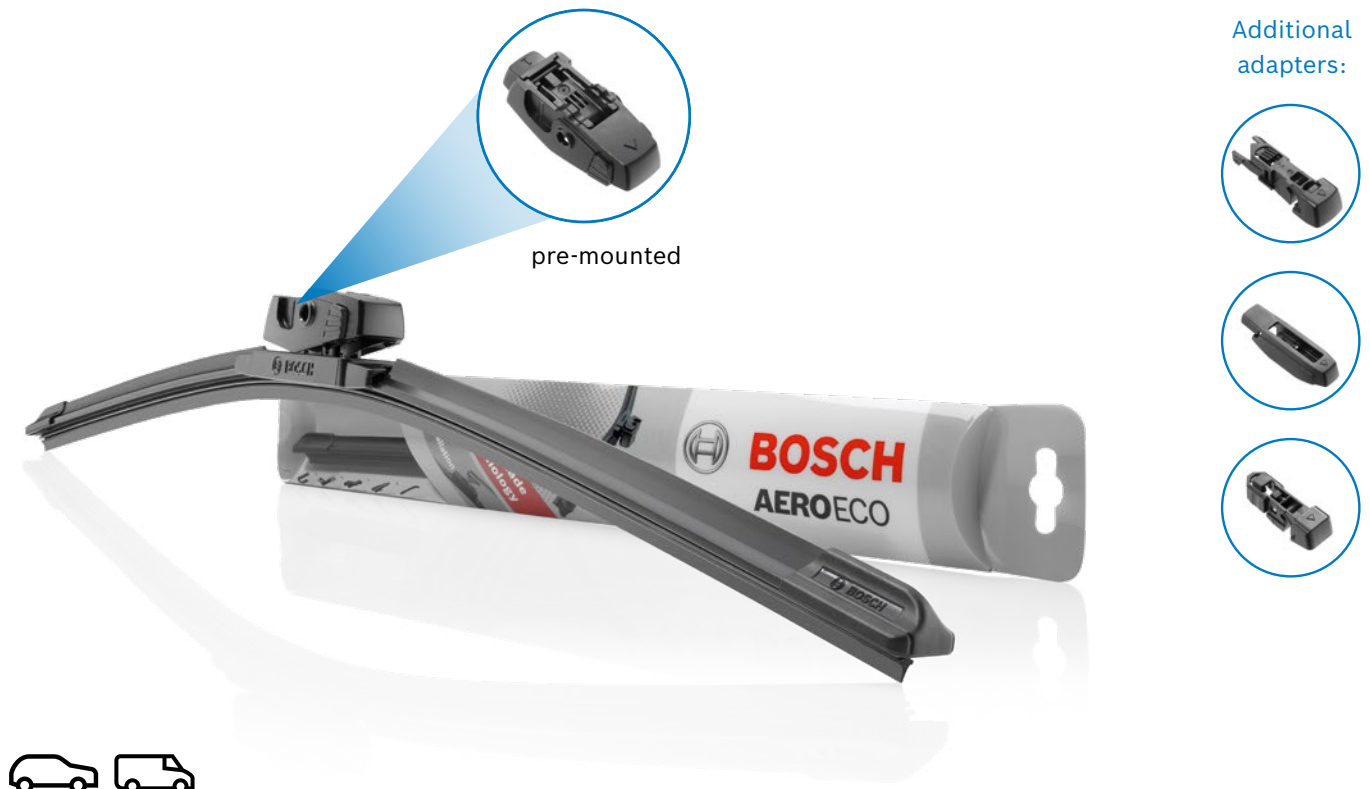

The pre-mounted Double Lock adapter combines hook and sidelock adapters.

Twin metal-bracket wiper blade

Technology

For effective, low-noise windshield cleaning and a long service life:

The Bosch Twin bracket wiper blade has a two-component wiper rubber with smooth-running coating and is available in variants with and without spoiler.

Product information

High vehicle coverage

Bosch wiper blades fit almost any vehicle. This means that various customer requirements can be met quickly and easily from a single source and in top Bosch quality.

Twin metal-bracket wiper blade

Product details

For effective windshield cleaning, a smooth action and high durability:

The Bosch Twin conventional wiper blade has a dual-material rubber with smooth-glide coating and includes a pre-assembled Quick-Clip universal adapter for vehicles with hook-type wiper arms.

Advantages at a glance

- **Very good cleaning and an even smoother action:** dual-material rubber wiper technology with smooth-glide coating
- **Consistently clean and clear view:** modern bracket system distributes wiper rubber pressure evenly over the windshield
- **Long-lasting safety even in extreme weather conditions:** robust metal bracket system with triple corrosion protection
- **Improved service life:** wear-resistant twin wiper rubber
- **Quick and easy installation:** pre-mounted Quick-Clip universal adapter for vehicles with U-hook wiper arms
- **Good wiping performance even at higher speeds in versions with spoiler:** the aerodynamically shaped twin spoiler presses the wiper blade against the windshield at higher speeds, preventing the wiper blade from lifting off

Eco metal-bracket wiper blade

Product details

High quality as value-based solution:

The Bosch Eco wiper blade has a natural rubber wiper with graphite coating and includes a pre-assembled Quick-Clip universal adapter for hook-type wiper arms on older vehicles.

Advantages at a glance

- **Thorough cleaning and smooth action:** natural wiper rubber with graphite coating
- **Improved service life:** robust all-metal bracket system with corrosion protection
- **Quick and easy installation on older vehicles:** pre-assembled Quick-Clip universal adapter for U-hook wiper arms

Did you know?

Bosch wiper blades undergo rigorous performance and functional testing. This ensures high quality over a very long period

for safety and very good wiping results.

Product information

Clear rear view

A clear view through the rear window is important in city traffic, when parking or on cross-country trips. For this reason, when changing the wipers, it is important to make sure that the rear wiper blades is also regularly replaced.

Rear wiper blades

Product range

	Metal-bracket wiper blade	Design plastic wiper blade	Aerotwin flat wiper blade	Aerotwin rear wiper blade with multi-adapter
	For a very good view to the rear and improved safety. Rear wiper blades from Bosch deliver outstanding wiping performance and a long service life.			
Technology	Proven, conventional wiper technology	Is largely identical in form and function to the original equipment	Features the same flat blade technology as the Bosch Aerotwin for windshields	
Wiper-rubber technology	Natural rubber with graphite coating for thorough cleaning		Power Protection Plus wiper rubber technology for outstanding wiping results, minimal wiping noise and long service life – even in extreme heat or cold	
Adapter system	Vehicle-specific adapter	Vehicle-specific adapter	Vehicle-specific adapter	Modular adapter system with 4 adapters
Assembly	Robust full metal bracket system	Robust plastic bracket construction design	Flat design with bent spring strip	
Amount of part numbers	32	55	40	6
Market coverage*	The available rear wipers cover 95% of all vehicles in Europe.

Note: When changing the rear wiper, you cannot freely select the technology. The rear wiper must be replaced with the same technology as specified by the vehicle manufacturer as original equipment.

Rear wiper blades

Product details

Clear rear visibility and improved safety. Rear wiper blades from Bosch offer outstanding wiping performance and a long service life.

Aerotwin flat wiper blade

Design plastic wiper blade

Metal-bracket wiper blade

Advantages at a glance

- **Durable and robust:** Bosch rear wipers ensure outstanding and long-lasting wiping performance
- **Easy wiper replacement:** matching adapter solutions enable quick and easy installation
- **Specific solutions for almost all vehicles:** consisting of Bosch Aerotwin flat wiper blades, design plastic wiper blades or metal-bracket wiper blades

Did you know?

Consisting of flat wiper blades, design plastic and metal-bracket wiper blades, the Bosch rear wiper blade range offers the right solution for almost every vehicle and thus achieves a

high vehicle coverage

Rear wiper blades

Technology

In bad weather, clear visibility to the rear is essential. Bosch rear wipers – with the Aerotwin flat wiper blade, the high-quality design plastic wiper or the proven metal frame wiper – ensure very good visibility and a high level of safety.

Aerotwin flat wiper blade

The Bosch Aerotwin is a good choice for the rear window too. It offers outstanding wiping performance, wipes very quietly and is extremely durable. No wonder: like the proven Aerotwin for the windshield, it features the patented Power Protection Plus wiper blade technology.

Design plastic wiper blade

Design rear wipers are special developments that are almost identical in form and function to the original equipment of the vehicle manufacturer. They have been developed specifically for each vehicle, making them easy, quick and reliable to fit and ensuring very good wiping performance.

Metal-bracket wiper blade

These wipers use proven conventional technologies and provide reliable wiping performance in everyday use. They are available both as standard solutions with pre-mounted adapters and as vehicle-specific full metal solutions.

Wiper blades

Development, production and quality tests

Development and innovation

High comfort, pioneering design

- All components are developed in a vehicle-specific manner and the wiper system is adjusted down to the last detail by means of latest tools
- At the wind tunnel, Bosch tests e.g. different wind conditions and speeds

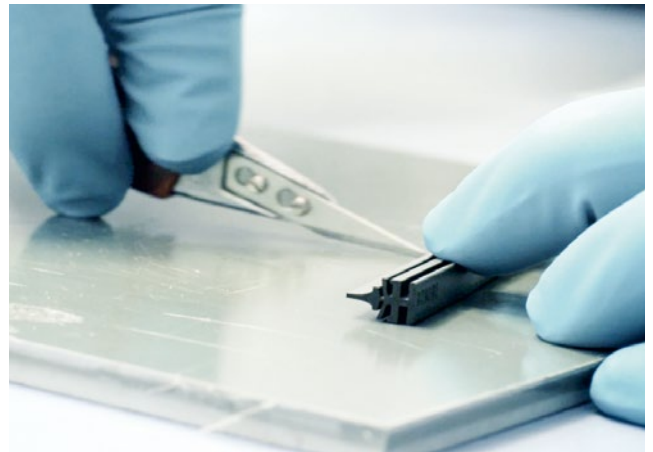

Bosch develops wiper blades in Bühl (Germany) and Tienen (Belgium)

Large-batch production

Special Bosch rubber compound received numerous awards

- Consistently high series-production quality of the rubber compound ensured by sophisticated analyses at the laboratory prior to release for production
- Durable wiper rubber thanks to its high resistance to wear, UV radiation and aging as well as to its high thermal elasticity

Performance and resilience tests

Prime principle: safety and reliability first

- Stringent performance and resilience tests at the test laboratory as well as right on the vehicle provide the basis for the consistently high quality of Bosch wiper blades
- The tested factors include resistance to environmental and ozone influences, chemical exposure and abrasion, among others
- Performance tests concerning wiper performance, noise generation, high-speed behavior and durability for lastingly high wiping quality

Wiper blade packaging

Appealing, practical and informative

The performance of Bosch wiper blades is impressive – just like the packaging. Its appealing design is a real sales support. A lot of practical details ease the selection of the right wiper blade as well as its installation.
