# CONNECTIVITY

**Bosch Connected Repair:**  
the solution for  
connected workshops

# What drives you, drives us

Technology from Bosch is used in practically every vehicle in the world. For us, the focus is on people and helping them to stay mobile.

We have been dedicated to people for more than 125 years with our pioneering spirit, research, production, and expertise.

And we continue to work on our combination of solutions for spare parts, diagnostic devices, workshop equipment, and services:

- ▶ Solutions for efficient vehicle repairs
- ▶ Innovative workshop equipment and software
- ▶ One of the world's largest selections of new and replacement parts
- ▶ Large dealership network for quick and reliable parts supply
- ▶ Competent hotline support
- ▶ Comprehensive educational and training offerings
- ▶ Targeted sales and marketing support

# Quick, easy, connected:

## Increase efficiency in your workshop with Bosch Connected Repair

Within the workshop there are devices and services that need information. Data about the customer, about the vehicle, about the fault, or the required service. All of these systems communicate with the user – but not with each other. Bosch Connected Repair (CoRe) is the convenient solution: a software that connects workshop equipment, vehicle and repair data.

Whether for faults or saving data and images in accordance with the General Data Protection Regulation – the latest CoRe version has been adapted to meet our customers' every need, ensuring you remain competitive.

Up to

### Your benefits at a glance:

- ▶ **SAVE TIME** Vehicle identification is performed once and then transmitted to all connected devices. At 30 seconds per vehicle, this adds up to a time saving of several hours each year.
- ▶ **STREAMLINE PROCESSES** Test protocols, comments, and images are saved directly to the digital job card and can be accessed at any time.
- ▶ **INCREASE EFFICIENCY** All employees can easily access the digital job card and the vehicle status at any time. Typing errors are reduced to a minimum.
- ▶ **EXPAND THE RANGE OF FUNCTIONS** The measurement results for products from other manufacturers can be attached to an order and benefit from the electronic database.
- ▶ **BOOST CUSTOMER SATISFACTION** A transparent and easy-to-understand final report increases customer confidence.

# Simple steps – extensive solutions

## Connecting workshop management systems

The benefits of CoRe are already available to every workshop: more than 50 partners around the world currently support CoRe connectivity. Contact your DMS provider to find out more.

## Quick vehicle identification

New search algorithms in conjunction with flyout menus facilitate and accelerate vehicle identification. Identification, using different characteristics (such as VIN, DVLA, and country code), can be directly read out of the vehicle.

## Reviewing progress

The service manager can view the status of the digital job card at any time, and all employees can access the jobcard at any time using any of the connected devices. The integrated e-mail function enables information such as job cards, pictures, and tasks to be sent directly to the customer.

## Extensive documentation

All individual test results can be displayed in either individual reports or in summarized form. A personalized version of the report with an individual company logo is also possible.

### Integration of images with the PictureApp <sup>NEW</sup>

Images taken on mobile devices can be easily included and commented in the digital job card. The PictureApp facilitates the connection of tablets and smartphones, making it simple to take and integrate photos.

### Detailed vehicle history

Vehicle information from previous visits is stored and easy accessible. Even PDF files from external systems (e.g. vehicle reports from other manufacturers) can be included, thus rounding out the customer's vehicle history.

### Connection with asanetwork

Jobs distributed in the workshop by asanetwork can also be completed using integrated products. That means many workshops can immediately start using some of CoRe's benefits.

### Connectable in many ways

Not only Bosch products use CoRe: products from third-party manufacturers (using an up-to-date Windows version) can also submit measurement results to CoRe and benefit from the electronic database.

# Bosch Connected Repair

## optimizes your workshop workflow

### Following products can be connected:

Category	Product	Version
Air conditioning service	ACS 752	V. 4.4
	ACS 753	V. 76.28.24
	ACS 763	V. 76.28.24
	ACS 863	V. 76.28.24
Control unit diagnosis	ESI[tronic] 2.0	V. 2016/3
Emission tester	BEA-PC AT	V. 1.4.
	BEA PC ES	V. 1.0
	BEA-PC UNI	V. 1.30
Headlamp testers	HTD 815	V. 2.0.4
Vehicle system analysis	FSA 050	V. 2.1
	FSA 500	V. 2.1
	FSA 7xx	V. 7.00
Tire tread measuring system	TTM 2104	V. 1.0
Wheel alignment	FWA 43xx	V. 5.0b367
	FWA 44xx	V. 5.0b367
	FWA 44xx+	V. 5.0b366
	FWA 46xx	V. 5.0b365
	FWA 46xx+	V. 5.0b364
	FWA 9000	V. 5.0b349
Brake testers and test lanes	BSA SDL (Pkw)	BSA_V. 2.84c SDL_V. 4.1
	BSA 7xxx/8xxx	V. 2.0.7.0

The product is constantly extended. Products from other manufacturers that use the Windows 7 operating system or higher can send measurement results back to CoRe.
