Tips and tricks concerning the maintenance of Bosch wiper blades

BOSCH

Invented for life

Bosch wiper blades are high-quality products. Installed on vehicles, a clear view is ensured at all times. Our tips and tricks will reveal how you can make sure that your Bosch wiper blades provide excellent wiping results for a long time.

How to achieve outstanding wiping results

Regularly clean the windshield and the wiper rubbers!

- ▶ Wash off any residues of insects, resins and pollen
- ▶ If possible, use an insect sponge

Top up the windshield washer tank!

- ▶ Regularly check the level of windshield washer
- ▶ Use the right windshield washer to top up the tank
- ▶ Stick to the specified mixture ratio!

Replace wiper blades regularly!

- ▶ For the best results, always replace your wipers after each winter season
- ▶ Replace them at least once a year

Remove leaves and coarse dirt!

- ▶ Do not operate the wiper blades, when your windscreen is dirty as this could damage the wiper rubber.
- ▶ Add windshield cleaner to the windshield washer

Prepare the wiper blades for the winter season!

- ▶ Add antifreeze agent to the windshield washer as soon as the temperatures start dropping
- ▶ Lift the wiper blades at night or put a foil / cardboard between wiper blade and windshield
- ▶ Never operate the wiper blades on a frozen windshield!

Bad wiping results despite proper maintenance?

Insufficient wiping results can still occur despite regular replacement and optimum maintenance. This could be as a result of a number of various reasons. Our checklist will let you know how to solve this issue.

Wiper blade checklist

! Cause of bad wiping results

The wiper blade installed is not the one specified for the vehicle
