

Bosch 2-Wheeler & 3-Wheeler Spares & Accessories

Powering the perfect ride.
2023

Bosch 2-Wheeler & 3-Wheeler Advantage

Technologies from Bosch are used in almost all leading 2-Wheeler brands – assuring safe, comfortable, and efficient rides. We have dedicated over 125 years of pioneering spirit and expertise in continuous research and manufacturing to achieve this. We continue to work with our unique combination of spare parts, accessories, workshop solutions, and services.

Choose the best. Choose Bosch to power the perfect ride.

Some of the top reasons why dealers and workshops prefer Bosch 2-Wheeler Parts and Accessories:

Comprehensive Range

The Bosch range of 2-Wheeler Parts includes Brake Parts, Clutch Plates, Flashers, Filters, Horns, Ignition Coils, Spark Plugs, Lubricants, Lighting, Relays, Lighting Coils, Stators, and Source Coils.

Consistency

Our high-quality products – tested in the toughest conditions – ensure reliability and long-lasting performance, and are designed to meet legal requirements.

Certified Quality

Vehicle manufacturers have come to rely on Bosch's high-quality standards and testing procedures, especially in the aftermarket.

Wide Coverage

Bosch products are designed for a wide range of vehicle models.

Precision

Individually designed and tested solutions for every vehicle make.

Training Programme

Training programmes for professionals are held at modern training centres across India. A technical hotline, knowledge database, and comprehensive information sheets are provided for further support.

Trust

Being the world's leading automotive systems manufacturer, Bosch ensures that every product meets the stringent quality demands of original equipment manufacturers.

Automotive Batteries

Modern vehicles are equipped with more and more components running on electrical energy. They need to be supplied with reliable sources of energy with high performance. Equipped with modern technology and featuring a corrosion-proof design, Bosch automotive batteries provide different types of vehicles with the energy they need – over long periods.

2W Battery

Bosch M6 Batteries

- Bosch M6 AGM batteries ensures top starting performance though frequently subject to short distance trips
- AGM technology keeps the self-discharge rates low thus increasing the service life of the battery by 20% in comparison with conventional starter batteries
- Ready to use / maintenance-free
- Powered by AGM technology, these batteries are particularly vibration-resistant making them perfectly suitable for powersports and off-road applications
- AGM technology features a higher resistance to deep discharge and a higher cold-starting performance than conventional starter batteries

3W Battery

Bosch S3/S4/S4+ Batteries

- Outstanding starting power and a long service life: Optimised current flow and less corrosion increase the cold-start performance
- Absolutely maintenance-free: The double lid with labyrinth design returns condensed water to the battery, thus reducing the water consumption, and preventing sudden leaks of acid if tilted
- Particularly high corrosion resistance: Ensured by optimised production processes
- High safety: Ensured by double backfire protection and integrated central degassing

Brake Fluid (2-Wheeler and 3-Wheeler)

Brake fluid is one of the most important components in a braking system. It transfers the braking force from the brake master cylinder to the wheel brakes. Additionally, it lubricates the moving parts and protects the entire system from corrosion. Brake fluids are also suitable for use in clutch systems. To do all this efficiently, the brake fluid must have a constant viscosity and boiling point that allows it to function under all temperatures and operating conditions.

Bosch Brake Fluid conforms to DOT standards, in accordance with ISO 8654-2001. The chemical properties of the fluid ensures excellent responsiveness during the braking process and provides greater safety to riders.

Features:

- High boiling points to inhibit the formation of vapour
- Optimum viscosity for constant pedal pressure even in extreme temperature conditions
- High-quality additives
- Enhanced lubrication of hydraulic components

Benefits:

- Steady braking response by the prevention of vapour lock
- Smooth and safe braking
- Protection against vapour formation
- Long lifespan and secure functionality of all braking fixtures

F 002 H60 021-8F8		500 ml	210.00

Brake Pads (2-Wheeler)

A braking system is as strong as its weakest point. That is why there can be no compromise in the overall braking system, especially in key components such as brake pads. Asbestos-free Bosch Brake Pads ensure enhanced, all-weather riding comfort with excellent stopping distance from the very first stop.

Because when it comes to safety there are no second chances. Bosch Brake Pads have been designed with advanced technology. The following is a closer look at some of the unmatched features and benefits that power a safe and comfortable ride.

Features:

- Advanced friction technology
- Asbestos-free construction
- Optimum coefficient of friction
- Better NVH (noise, vibration, and harshness) characteristics
- Outstanding performance at higher temperatures

Benefits:

- Excellent stopping distance
- Elimination of cancer-causing materials
- Easy to mount and dismount
- Improved driving comfort
- Resistance to fading

Brake Shoes

Brake shoes are an integral part of the braking system. They are made of friction components that get worn out due to frequent usage and external conditions. For better safety and performance, proper installation, regular maintenance, and timely replacement are recommended. With excellent stopping distance and improved all-weather riding comfort, Bosch Brake Shoes offer you a superior riding experience, like no other. Manufactured using advanced friction formulation and as per original equipment manufacturers' specifications, asbestos-free Bosch Brake Shoes offer consistent braking performance.

2W Brake Shoes

Features:

- Advanced friction formulation for Smooth braking, extended wear, consistent performance, and long life
- 100% asbestos-free shoes reduces Elimination of exposure to harmful friction material
- Designed as per OEM specifications ensuring proper fit
- Rust-inhibitive coating provides protection against corrosion
- Better NVH characteristics for improved riding comfort

3W Brake Shoes

Brakes Master Cylinder and Kit (3-Wheeler)

The master cylinder is a pressure-generating cylinder in the hydraulic brake system. Every vehicle equipped with a hydraulic brake system has a tandem master cylinder.

It converts the foot pressure on the brake pedal into hydraulic braking force, admitting the brake fluid into the brake circuits.

Benefits:

- Complex production processes and stringent quality control assure optimal performance
- Superior quality material for seals and pistons prevent premature failure and leakage
- Abrasion is minimised by optimised contact surfaces and pistons
- High efficiency, low volumetric capacity
- High ventilation capacity
- Compact design
- Made from cast iron or aluminium

Brake Wheel Cylinder (3-Wheeler)

Brake Wheel Cylinders transfer the brake pressure generated in the master cylinder to the drum brake shoes. As a result, the brake shoes are pressed against the brake drum. Tested in various brake application cycles under wide test temperatures, wheel cylinders from Bosch comply with the highest safety standards and easily pass strict testing procedures.

Features

- Close tolerances ensure long service life
- Continuous safety / leak testing
- Superior quality and durable materials (cast iron or aluminium, weight reduced)
- Pressure and dust protection sleeves made from EPDM ensure optimal functioning and leak-tightness, and prevent the ingress of dirt, air, and moisture

Brake Wheel Cylinder Kits (3-Wheeler)

These are minor kits that are used for servicing the Wheel Cylinder Assembly. They consist of Rubber Seals and Hardware (Boot, Seal, Spring, or Bleeder Cap). The rubber parts in the Wheel Cylinder Assembly need to be replaced at regular intervals. Also, when the Wheel Cylinder Assembly fails but the body is in good condition, the Wheel Cylinder Kit can be used to restore its performance instead of replacing the entire assembly.

The seals are made of special-quality synthetic rubber with imported raw materials which are tested under stringent conditions to get the required performance.

Components of the Wheel Cylinder Kit:

- Rubber Seals
- Boot
- Spring / Bleeder Cap

Features:

- Simple stock-keeping
- Perfectly matched individual components

Clutch Plates and Pressure Plates (2-Wheeler and 3-Wheeler)

Clutch Plates and Pressure Plates from Bosch have been a force in riding technology in India for many years. Now they are even better as the range is completely asbestos-free, in line with international standards.

Get the same high quality and high performance, with even more safe-to-use products.

Features:

- As per OEM design
- High-quality friction material
- Pressure plates of carbon-controlled main steel with spring-back effect

Advantages:

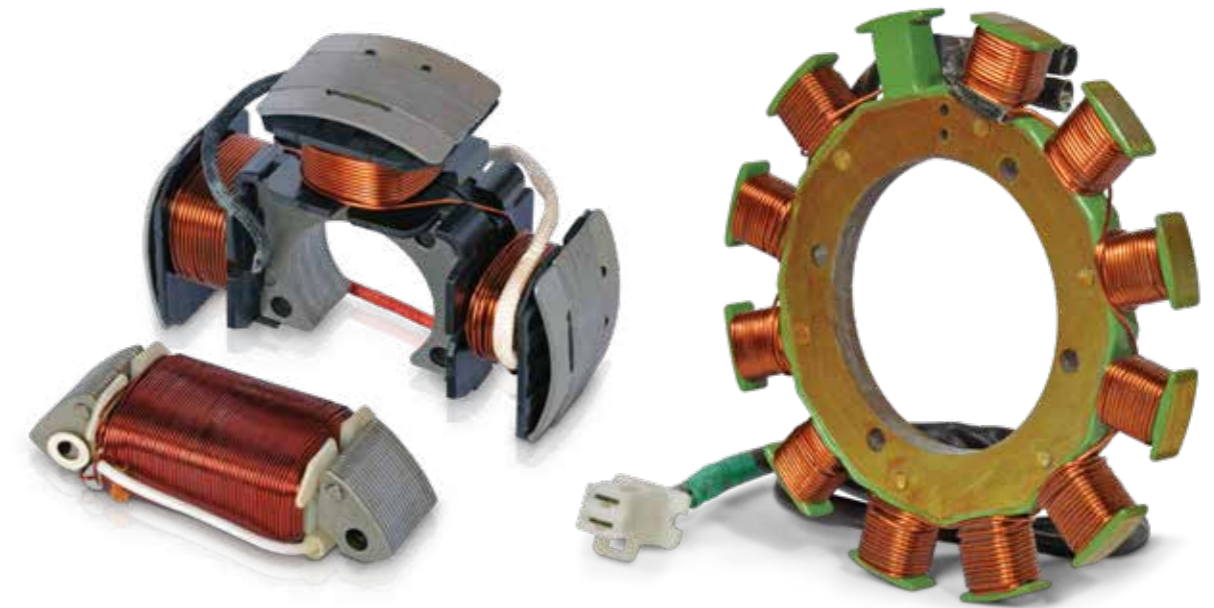

- Long and consistent performance
- Reduced vibration and noise

Benefits:

- Longer life
- Easier shifting of gears
- Optimum torque transmission
- Improved pickup
- Jerk-free ride

Coil Plate Assembly (3-Wheeler)

Lighting Coils and Stators from Bosch provide better illumination over a long operating life. Featuring high-quality copper, dual-coated insulation, and a robust core, the Bosch Lighting Coil and Stator improve battery performance, are highly resistant to corrosion, and can withstand vibration.

Features

- Made from high-quality, pure copper
- Dual-coated insulation
- Withstands high levels of thermal stress
- Robust core

Advantages

- Improved battery performance
- High levels of illumination
- Better lighting voltage with fluctuating RPMs
- Enhanced corrosion and vibration resistance for a longer operational life

Diesel Parts (3-Wheeler)

Bosch has been catering to the needs of a large number of engine manufacturers worldwide. Single Cylinder Pumps (PF) cater to a wide range of applications ranging from agricultural and farm equipment, industrial engines / generators to automotive, commercial vehicle, railways, and marine engines.

Features

- Wide variety of pumps to suit diverse engine needs (A, B, K, Q, W, PF30, PF37, PF41, PF43)
- Varied pressure capabilities of 400–1050 bar
- Suitable for 3 to 200 hp/cylinder diesel engines from 2 kW to 2300 kW

Benefits

- Modular design
- Easier adaptation for different types of engines (1, 2, 3, 4.....16 cylinders)
- Easy maintenance

Filters

The importance of filters in vehicles cannot be overstated. But for cost reasons, many vehicle owners change their filters less frequently than recommended and thereby damage high-grade technical components of their vehicle.

As a system supplier with expertise in the entire field of engine management, Bosch is aware of the importance of filters. Continuous activity in research and development consolidates the leading position and the competitive edge of Bosch and ensures further development of innovative and environmentally compatible filters. The filter range is updated constantly to incorporate state-of-the-art technology.

2-Wheeler Air Filters

Features:

- Microfibre media impregnated with a special resin to maximise airflow while trapping and preventing harmful dirt from entering the engine
- Synthetic connection sealing to ensure only filtered air reaches the engine thus preventing leakage
- Reduces the air-intake noise
- High-end multigrade media to increase dust-holding capacity and efficiency

Benefits:

- Ensures that only clean air enters the combustion chamber, thus reducing engine wear
- High filtration capacity and long service life
- Enhanced engine power and improved throttle response

2-Wheeler Petrol Filters

Features:

- Designed to meet OEM requirements
- Protects the carburettor / fuel injectors
- High burst strength

Benefits:

- Protects the engine
- Improves mileage
- Prevents loss of power

2-Wheeler Lube Oil Filter Inserts

Features:

- Removes contaminants like dust, metal abrasion, carbon deposits, and soot particles. This helps in maintaining the lubricating capability of oil during maintenance intervals
- High filtration efficiency and long life
- Designed to meet OEM specifications

Benefits:

- Bypass valve benefits
- Ensures optimal protection of the engine components, leading to longer engine life
- Operates even under extreme conditions and enhances engine performance

Filters

3-Wheeler Diesel Filter

Features:

- Available in two forms: Spin-on and Insert
- Special filtering media with a high dust-holding capacity for a longer and hassle-free service life
- Better separation of water and fuel to prevent damage from corrosion
- The stability of the filtration is maintained even at the highest pressure of injection
- Optimized pore size in the media to separate even the smallest particles and at the same time ensure free flow of oil

Horns (2-Wheeler and 3-Wheeler)

Whether it is the city roads or the highway, Bosch Horns have been designed for specific vehicle models keeping the discerning motorist in mind. Complete with sturdy brackets for a perfect one-time fit, Bosch Horns can be conveniently mounted.

Bosch Horns are tested under rigorous operating conditions, including tests for vibration and corrosion resistance, continuous blasts, endurance, water and dampness resistance, temperature, stability, etc.

Variants

Symphony Horns

Features:

- Pleasant tone
- Fracture-resistant plastic trumpet
- Easy horizontal or vertical mounting

FC4 Standard Disc Horns

Features:

- Penetrating sound over long distances
- Galvanised steel for protection against corrosion, dust, and humidity

Impact Horns

Features:

- Powerful sound output
- Attractive grill design
- Hydrophobic filter with nitrile pipe to reduce instances of coil burn
- Weather-, impact-, and corrosion-resistance

Horns (2-Wheeler and 3-Wheeler)

Sharptone Horns

Features:

- All-weather horn with external mounting
- Compact design and aesthetically appealing sound
- Teflon filter technology keeps out dirt and humidity
- Corrosion-resistant

Offroader 100

Features:

- Repairable components
- High-quality construction

Mini

Features:

- Unique miniature design for easy mounting on two wheelers
- Has a penetrating sound output
- Can be tuned and adjusted for desired volume of sound
- Corrosion-resistant
- Contains a serviceable component

Scarlet Horns

Features:

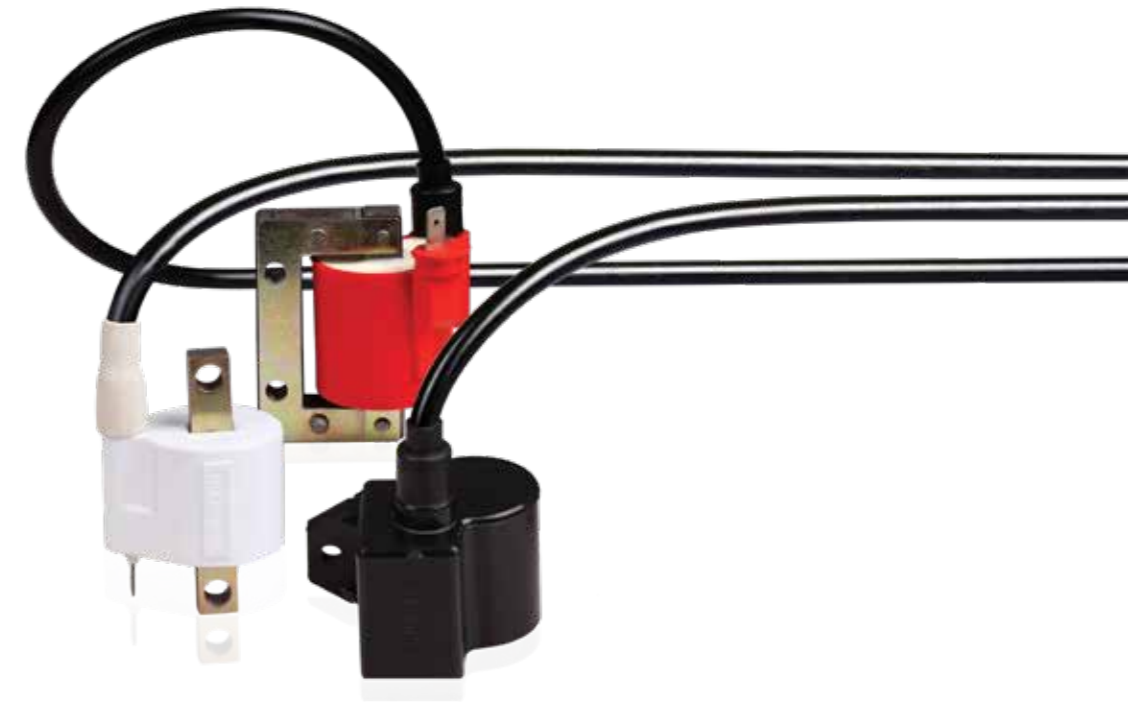

- Large trumpet for enhanced sound proliferation
- Robust build for greater durability and reliability
- Corrosion-resistant
- EMC protection

Ignition Coils (2-Wheeler and 3-Wheeler)

Say goodbye to troublesome cold-starts with Bosch Ignition Coils!

An essential part of the gasoline engine's ignition system, Bosch Ignition Coils provide you with ample spark energy, thereby helping prevent cold-start problems. The advanced technology also helps the engine sail through emission tests.

Bosch Ignition Coils are long-lasting with precise, corrosion-resistant connections; the insulation is made from high-quality synthetics, thereby ensuring a high breakdown voltage.

Features:

- Dual-coated insulation
- Withstands high levels of thermal stress
- Contains high-quality, pure copper

Advantages:

- Better spark energy
- Low RPM ignition
- Reduced exhaust emissions
- Lower fuel consumption

Lighting-Bulbs (2-Wheeler and 3-Wheeler)

Light up the night with Bosch Automotive Lighting systems. Bosch Automotive Lighting meets the highest standards and offers the right product for every application. With outstanding light output and long life, the automotive bulb range ensures superior illumination of the road.

The extensive lighting range includes headlamps, stop & tail lamps, conventional bulbs, miniature bulbs, and headlamp assemblies.

MAX Bulbs-M5

Features:

- A special filament gives brighter, sharper, glare-free light for the same power
- An accurately designed filament gives excellent spread of light on the road
- Specifically designed for specific vehicles
- Long life
- Uniform bright light over the entire life of the bulb
- Affordable prices

HS1 Halogen Bulbs

Features:

- Universal fit for new two-wheelers
- Unique tungsten filament design
- Improved halogen technology
- Higher light intensity
- Longer life
- Brighter light for a safer journey

HS1 Chilled

Features:

- Soothing white light
- Up to 4,300 Kelvin
- Brighter & sharper
- Imported components
- UV block protects the headlamps from harmful radiation

Lighting-Bulbs (2-Wheeler and 3-Wheeler)

Racer Xtra Bright

Specially crafted for two-wheelers, Bosch HS1 Racer Xtra Bright Bulb (45/40W) is designed to deliver exceptional light even in the darkest of nights. It illuminates your view brilliantly and keeps your adventure alive.

Benefits:

- 60% more light than a standard bulb
- Plug & Play – No relay required
- Attractive golden coating cap design
- Extra bright light for superior visibility
- Recommended for off-road applications

Miniature Bulbs

Features:

- Bulbs conform to international standards
- Highly transparent glass for good light output
- Imported filament ensures reliable operation
- Excellent light efficiency
- Perfect heat dissipation
- Longer hours of operation
- Manufactured on automatic, imported machines ensuring high quality of bulbs

Stop & Tail Lamps

Reliable choice for various applications like stop lights, brake lights, and indicator lights.

Features:

- Manufactured to international standards (IEC)
- Highly transparent glass
- Excellent light efficiency
- Perfect heat dissipation
- Long-lasting

Dependable choice for various applications like indicator lights and speedometer lights for two-wheelers.

Lubricants

Bosch continues to cement its place as an emerging lubricants player with a promise of consistent quality of its products and services. A 'pump-set to synthetic lube' brand offers a wide array of products to its customers, ranging from Engine Oils to Gear Oils, Greases, and Coolants.

Bosch Lubricants are formulated to provide maximum efficiency even under extreme conditions. Through excellent performance and by providing exceptional protection, Bosch Lubricants ensure that your two-wheeler engine performs smoothly and without hassle for a long period of time.

Engine oils (2-Wheeler)

Josh 4T

Bosch Josh 4T is an API SL, SAE 20W-40 two-wheeler mineral engine oil for 4-stroke engines, specially formulated for lubrication of the engine, clutch, and gearbox (ECG). It also meets JASO MA2 requirements.

Benefits:

- Optimised coefficient of friction for reduced wear of engine parts
- Optimum oil thickness reduces piston scuffing
- Good thermo-oxidative stability prevents harmful deposit formation and controls oil thickening, facilitating extended engine and oil life
- Effective rust- and corrosion-inhibition property

Josh 4T Plus

Bosch Josh 4T Plus is an API SL, SAE 10W-30 two-wheeler mineral engine oil for 4-stroke engines, specially formulated for lubrication of the engine, clutch, and gearbox (ECG technology). It also meets JASO MA2 requirements.

Benefits:

- Excellent protection of engine components against wear, rust, and corrosion
- Less thickening of oil due to its excellent thermo-oxidative stability
- Ensures smooth running of the engine in all climatic conditions
- Enhanced catalytic converter life due to improved harmonisation

Josh 4T Prime

Bosch Josh 4T Prime is an API SL, SAE 20W-50 two-wheeler engine oil for 4-stroke engines, specially formulated to meet the demands of 150 cc and above bikes. It also meets JASO MA2 requirements.

Benefits:

- Effective rust- and corrosion-inhibition properties that ensure longer life of critical engine components
- Less thickening of oil due to its excellent thermo-oxidative stability
- Excellent anti-wear properties that protect vital engine and gear components, leading to reduced maintenance cost
- Sludge and varnish control that ensure lower emission levels

Lubricants

Engine oils (2-Wheeler)

Josh 4T Drift S1

Bosch Josh 4T Drift S1 SAE 15W-50 is an API-SM-level, supreme-quality synthetic-blend 4-stroke engine oil specially developed for air- and liquid- cooled 4-stroke motorcycles. Superior base oils coupled with advanced additive technology provide excellent protection and reliability under severe operating conditions.

This also meets the requirements of JASO MA2.

Recommended for all leading global motorcycles requiring engine oil with the latest industry specifications.

Features:

- Exceptional thermo-oxidative stability prevents deposit formation
- Excellent rust- and corrosion-inhibition properties
- Optimised frictional properties eliminate slippage and improve durability

Josh 4T Drift S2

Bosch Josh 4T Drift S2 is an API SN: JASO MA2: SAE 10W-40 semi-synthetic 4-stroke motorcycle engine oil specially formulated to boost power and acceleration. Blended with high-quality base oils and specially selected additives, it provides excellent protection for the engine, clutch, and gearbox.

This ensures that the full power of the engine is maintained throughout. Bosch Josh Drift S2 10W-40 is recommended for motorcycles from all leading global manufacturers requiring engine oil with SAE 10W-40.

Features:

- Designed to protect the engine from high-temperature oxidative thickening
- Offers superior wear protection
- Provides excellent sludge control
- Prevents high-temperature piston deposits
- Protects the catalytic converter

Lubricants

Engine Oils (3-Wheeler)

Power Boost

Bosch Power Boost API: CF4/SG; SAE: 15W-40 is a premium grade diesel mineral **engine oil** for **3-wheelers** and LCVs that provides excellent protection from engine wear and tear even in conditions of heavy load. Power Boost **engine lubricant oil** is formulated to provide excellent engine lubrication in smaller diesel engines, it protects against sludge and maximises **engine oil**. Recommended for use in diesel engines requiring 15W 40 grade

CNG Power

Bosch CNG Power API SF/CC 20W50 is a premium quality engine oil for 4 Stroke CNG/LPG driven 3-Wheelers / LCVs. This **CNG engine oil** has multi graded 20W-50 visco-matrix to facilitate easy starting even at lower ambient temperatures. Recommended for use in vehicles driven by CNG fuel

Lubricants

Gear Oils (2-Wheeler and 3-Wheeler)

Mono-Grade Gear Oils

Bosch GO – Mono-Grade Gear Oils are formulated with extreme pressure additives to provide protection to the automotive gear components by effective lubrication in transmissions and axle drives, where GL4 quality oils are specified. It is available in viscosities of 90 and 140 in the GL4 category.

Features:

- The extreme pressure additives provide excellent protection from wear even in extreme conditions
- High oxidation stability minimises sludge- and deposit-formation facilitating longer gear and bearing life
- Good anti-foam properties for effective lubrication
- Excellent seal-compatibility helps minimise leakages and reduces the chances of contamination

Multigrade Gear Oils

Bosch Glide and Glide Plus – Multigrade Gear Oils are formulated with extreme pressure additives to provide protection to the automotive gear components, operating under severe conditions by effective lubrication in transmissions and axles. The Multigrade Gear Oils are available in viscosities of 80W-90 and 85W-140 in the GL5 category.

Benefits:

- High load-carrying capacity for continuous high-speed and high-torque service
- Better fluidity at low temperatures reduces wear and provides easy start-up
- Excellent protection of gears against wear, even under extreme conditions
- High oxidation stability minimises sludge and deposit-formation facilitating longer gear & bearing life

Glide Synth 75W-90 Gear Oil

Bosch Glide Synth SAE: 75W-90 Semi-Synthetic Gear Oil is a super-slick and long-lasting gear oil designed especially for high-performance applications. It is made up of a special additive package that cushions gears and resists squeezing out under extreme pressure situations, where other gear lubricants just aren't good enough. Specially designed to stand up to high temperatures without losing its lubricity, Bosch Glide Synth 75W-90 is recommended for use in manual transmission and transaxles requiring API GL4 specifications.

Features:

- Excellent load-carrying properties provide protection from shock loads and wear, thereby ensuring transmission durability
- Excellent synchroniser-compatibility ensures smooth and jerk-free gear-shifting
- High thermal stability prevents deposit formation and keeps gears clean
- Ensures low-temperature fluidity and ensures less wear during cold-starts
- Resists foaming and provides robust oil film for enhanced lubrication
- High viscosity index provides superior performance under a wide variety of operating conditions

Lubricants

Others

Extended Life Lithium Grease (2-Wheeler and 3-Wheeler)

Bosch Grease is a premium quality, lithium-based, NLGI Class-3 grease which is suitable for both automotive and industrial applications. Fortified with high-quality lithium soaps and performance additives, Bosch Grease is recommended to be used in applications like the wheel bearing and chassis of two-wheelers, three-wheelers, and sub-1-ton commercial vehicles.

Benefits:

- Excellent oxidation and mechanical stability
- Good performance against water washouts
- Excellent low-temperature characteristics and high-temperature performance
- Good pumpability provides adequate dispensing of grease at all times

Front Fork Oil (2-Wheeler)

Featuring advanced performance parameters, Bosch Front Fork Oil provides excellent dampening in a wide range of suspensions for greater safety and increased comfort. Specially developed for application in the Front Fork Assemblies of two-wheelers, it minimises corrosion and protects against wear, prolonging seal-life, and making sure that you get the best performance from your two-wheeler, every time you ride.

Features:

- Excellent dampening effect
- Reliable seal compatibility
- Protection against wear, oxidation, and corrosion

Coolant (2-Wheeler and 3-Wheeler)

Ethylene glycol-based coolants from Bosch contain antifreeze ingredients that are responsible for protection from freezing, overheating, rust, and corrosion. Bosch offers two varieties of coolants – Coolant Concentrate and Tropical Coolants. Tropical Coolants are offered in both 1:3 and 1:7 ratios.

Features:

- Ensures rapid heat exchange with excellent heat transfer, providing optimum engine-cooling and longer engine life
- The corrosion inhibitors protect the interior surfaces of the radiators from rust and corrosion
- Higher ratio of glycol ensures better heat transfer from the radiators, providing quicker cooling
- Lower viscosity ensures lower pumping requirements

Relays (2-Wheeler and 3-Wheeler)

Bosch Automotive Relays find application throughout the automobile range, whatever the type and model, because almost all vehicles use a 12 V supply voltage. While this means that just about everything – every circuit and application – needs a large amount of current to work because of the supply voltage, it also means that they need Bosch Automotive Relays to function properly.

Features:

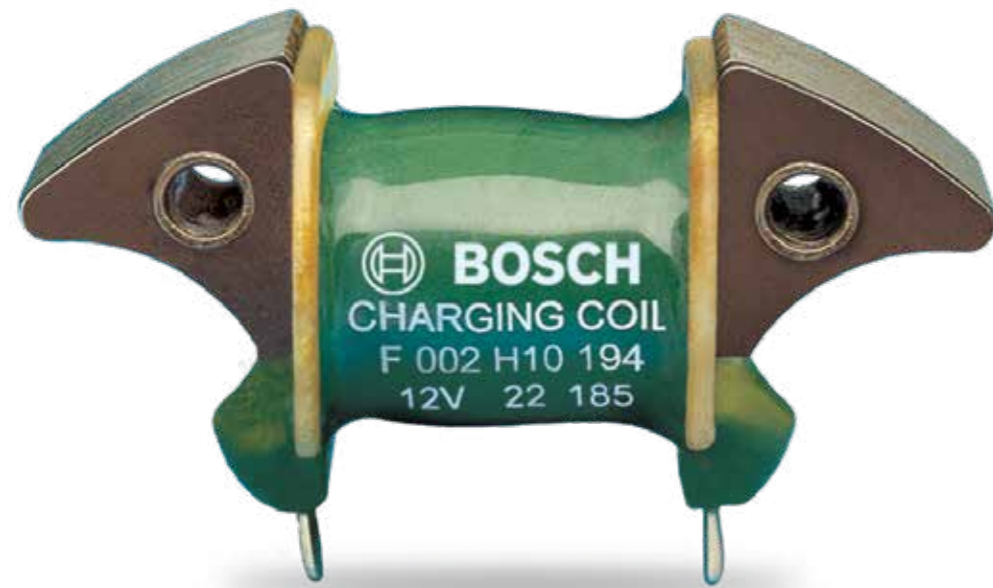

- Meets Indian Standard IS 2077:1996
- Excellent sealing against water and dust – inserted moulded terminals, connector, and housing sealed with Araldite epoxy resin
- Good mechanical and dielectric strength – use of engineering plastic PA6 for housing and connector
- Optimised PCB design with voltage drop

Benefits:

- Designed to withstand exposure to extreme conditions
- Switch high powers
- Functions efficiently and reliably in a broad temperature range
- Extremely resistant to vibration
- Long service life
- Highly climate-proof

Source Coils (2-Wheeler and 3-Wheeler)

Two- and Three-Wheeler Charging Coils from Bosch are made with high-quality raw materials processed with the help of high precision machinery. These coils are rigorously tested at each stage of the production process at up to ten times of the required voltage to ensure zero defects. All electrical parameters as per OEM specifications are strictly adhered to while testing.

Advantages:

- Hassle-free start-up
- Proper functioning of the ignition coil, which results in better pickup and mileage
- Long life and durability due to better insulation and heat endurance
- Proper fitment as per OEM specifications

Spark Plug (2-Wheeler and 3-Wheeler)

Bosch Spark Plugs, for the road, are of the same quality, performance, and technology as those proven on racetracks, in the world's most sophisticated racing engines. That is why Bosch offers the best-selling spark plugs in the world. Offering long service life, improved starting power and mileage, Bosch Spark Plugs enhance the overall performance of the vehicle by ensuring zero-compromise starts, each time, every time.

Nickel Spark Plug

Features and Benefits

- High heat conductivity with ground electrode made from nickel alloy and large copper core: For smoother engine operation and steady acceleration
- Nickel-plated housing and thread: For protection against corrosion and seizure in the aluminum cylinder head without the need for lubrication
- Factory pre-set electrode gap: Enables hassle-free replacement of spark plugs
- Manufactured using heat-shrink assembly: Improved resilience in extreme temperatures and ensures high gas-tightness

Spark Plug (2-Wheeler and 3-Wheeler)

Platinum Spark Plug

Features and Benefits:

- Developed with the same high quality which we supply to original equipment manufacturers: Outstanding spark plug technology which perfectly meets the requirements of the engines
- 360° continuous laser welded platinum firing pin at the centre electrode and a tapered yttrium enhanced ground electrode: For improved combustion and service life
- Large copper core center electrode: Enables an improved heat transfer
- Nickel-plated housing and thread: For protection against corrosion and seizure in the aluminum cylinder head without the need for lubrication
- Factory pre-set electrode gap: Enables hassle-free replacement for workshops
- Manufactured using heat-shrink assembly: Greater resilience in extreme temperatures and ensures high gas-tightness
- Ribbed insulator design: Prevents misfires due to flash-over

Iridium Spark Plug

Features and Benefits:

- Developed with the same high quality which we supply to original equipment manufacturers: Outstanding spark plug technology which perfectly meets the requirements of the engines
- 360° continuous laser-welded iridium firing pin at the centre electrode and a tapered iridium-enhanced ground electrode: Excellent combustion and improved service life
- Large copper core center electrode: Enables improved heat transfer
- Nickel-plated housing and thread: For protection against corrosion and seizure in the aluminum cylinder head without the need for lubrication
- Factory pre-set electrode gap: Enables hassle-free replacement of spark plugs
- Manufactured using heat-shrink assembly: Improved resilience at extreme temperatures and ensures high gas tightness
- Ribbed insulator design: Prevents misfires due to flash-over

Double Iridium Pin-to-pin Spark Plug

Features and Benefits:

- Developed with the same high quality which we supply to original equipment manufacturers: Outstanding spark plug technology which perfectly meets the requirements of the engines
- Fine wire 360° continuous laser welded iridium firing pins at centre and ground electrode: For superior combustion and an improved service life
- Large copper core centre electrode: Enables improved heat transfer
- Nickel-plated housing and thread: For protection against corrosion and seizure in the aluminum cylinder head without the need for lubrication
- Factory pre-set electrode gap: Enables hassle-free replacement for workshops
- Manufactured using heat-shrink assembly: Greater resilience at extreme temperatures and ensures high gas-tightness
- Ribbed insulator design: Prevents misfires due to flash-over

Starters Motors (3-Wheeler)

Bosch Starter Motors stand for performance, quality, and satisfied customers all over the world. This is due to our many years of experience, our well-founded specialized knowledge and the fact that our products are made within an international development and manufacturing network.

Benefits

- Ability to start under extreme climatic conditions
- Lower fuel consumption and emission due to design optimisation
- Better solenoid performance under adverse operating conditions
- Low maintenance due to higher carbon brush life and bearings

2-Wheeler Application

Notes

A series of horizontal dashed lines for writing notes.

What drives you, drives us

Bosch technologies are used in most vehicles worldwide. People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated over 130 years of pioneering spirit and expertise in research and manufacturing to achieving this.

We provide the aftermarket and workshops worldwide with modern diagnostic and workshop equipment and a wide range of spare parts for passenger cars and commercial vehicles:

- Solutions for efficient vehicle repairs
- Innovative workshop equipment and software
- One of the world's most comprehensive ranges of new and exchange parts
- Large network of wholesale customers, for quick and reliable parts supply
- Competent hotline support
- Comprehensive educational and training offers
- Targeted sales and marketing support
