## Bosch Ignition and Gasoline Injection Systems

The Bosch success story is defined by more than 100 years of experience and more than 10,000 items in the full gasoline injection range. Over the years, we have developed a comprehensive parts service, supplying replacements for worn-out parts, adding value to the aftermarket and workshop sector.

**1902**  
Delivery of the first high-voltage magneto and the first spark plug

**1973**  
Energy crisis – reduction in gasoline consumption becomes the number one development objective. Launch of the air-flow metering L-Jetronic and the mechanically / hydraulically controlled K-Jetronic – also an air-flow metering system

**1967**  
First emission legislation in the USA. Introduction of the first electronic injection system – the intake-manifold pressure controlled D-Jetronic

**1979**  
Motronic market launch. The digital processing of numerous engine functions made this system unique. It combines the L-Jetronic principle with electronic map-controlled ignition. The first microprocessor in an automobile

**1976**  
Bosch invents the lambda sensor, thus paving the way for regulated catalytic converters

**1987**  
Mono-Jetronic market launch. The Mono-Jetronic is an exceptionally economical, single-point injection system that enabled even smaller vehicles to be fitted with Jetronic

**1981**  
LH-Jetronic market launch. Instead of a flap-type air-flow sensor, the basic L-Jetronic system was fitted with a hot-wire air-mass meter and sold as LH-Jetronic for the first time

**1997**  
Increasing use of intake modules. Intake modules are pre-assembled units consisting of an intake manifold including injectors, throttle valve unit, pressure regulator, etc.

**1989**  
Mono-Motronic market launch. A development of the Mono-Jetronic the Mono-Motronic also featured electronic map-controlled ignition and a microprocessor

A vertical timeline is overlaid on a background image of a car's front end, featuring the headlight and wheel. The timeline consists of a central vertical line with circular markers at each year. Text blocks for each year are positioned to the left or right of the line. The background image is in a dark, blue-toned style.

**2003**

Launch of throttle device for ETC

**2000**

Market launch of Motronic gasoline direct injection. The Motronic MED 7 system with torque-based control enables minimum consumption to be combined with maximum dynamics

**2008**

500 million lambda sensors produced. 25 years of electrohydraulic transmission control; 100 million control units produced

**2006**

Launch of spray-form gasoline direct injection (piezo technology). Extension of product range with transmission control

**2012**

50 million high pressure injection valves HDEV5 and 10 million high pressure injection pumps HDP5

**2010**

10 million high pressure injectors HDEV5 and 2 million high pressure pumps HDP5

**2017**

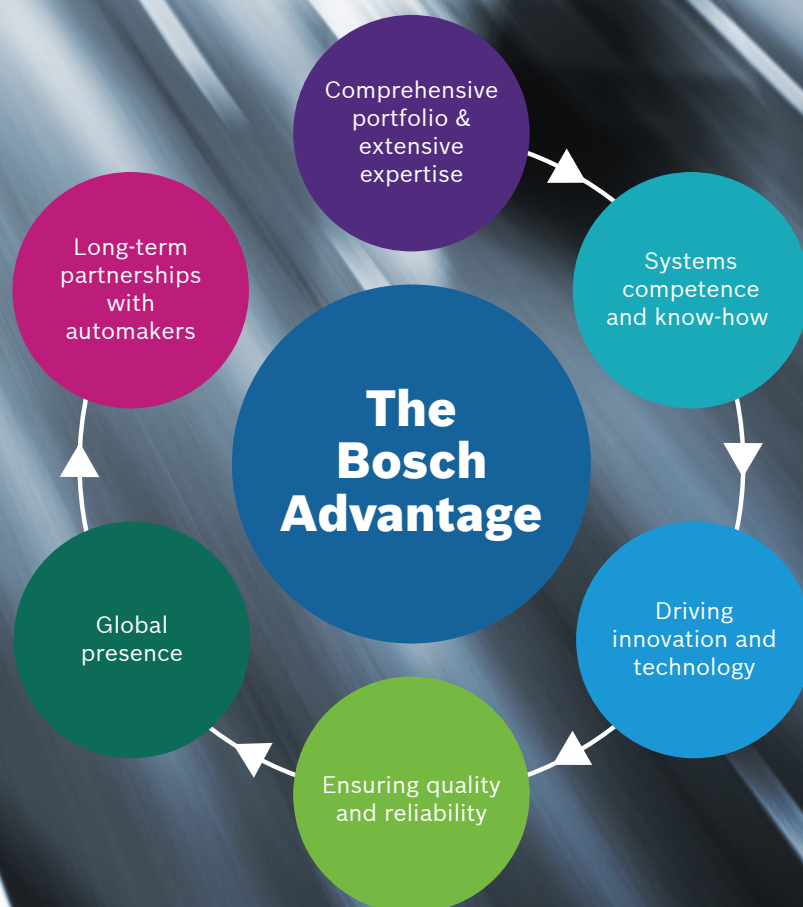

50 years of expertise in electronic injection systems

# Bosch Gasline Systems An Overview

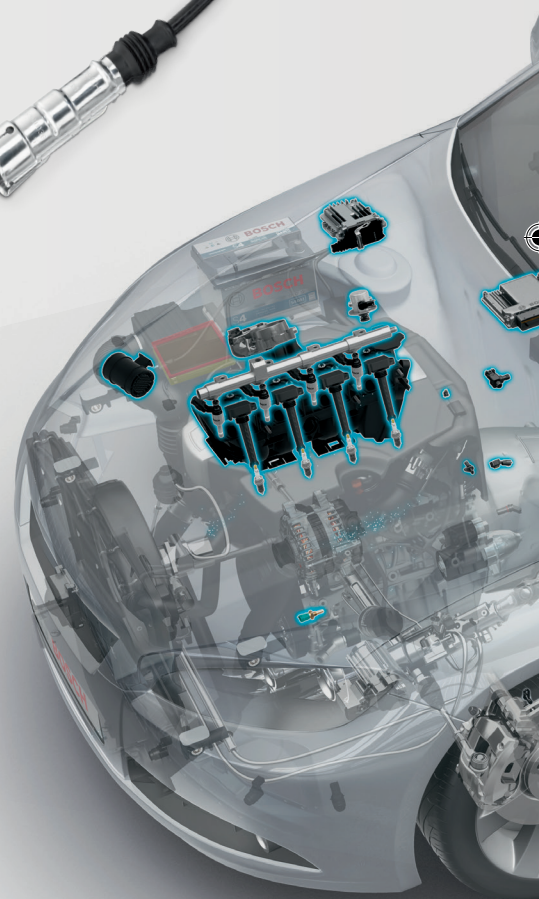

For over 125 years, Bosch has ensured the continued development and innovation of mobility solutions that are clean, economical, safe, and comfortable. Bosch is the leading, reliable, and trusted supplier to the global automotive industry.

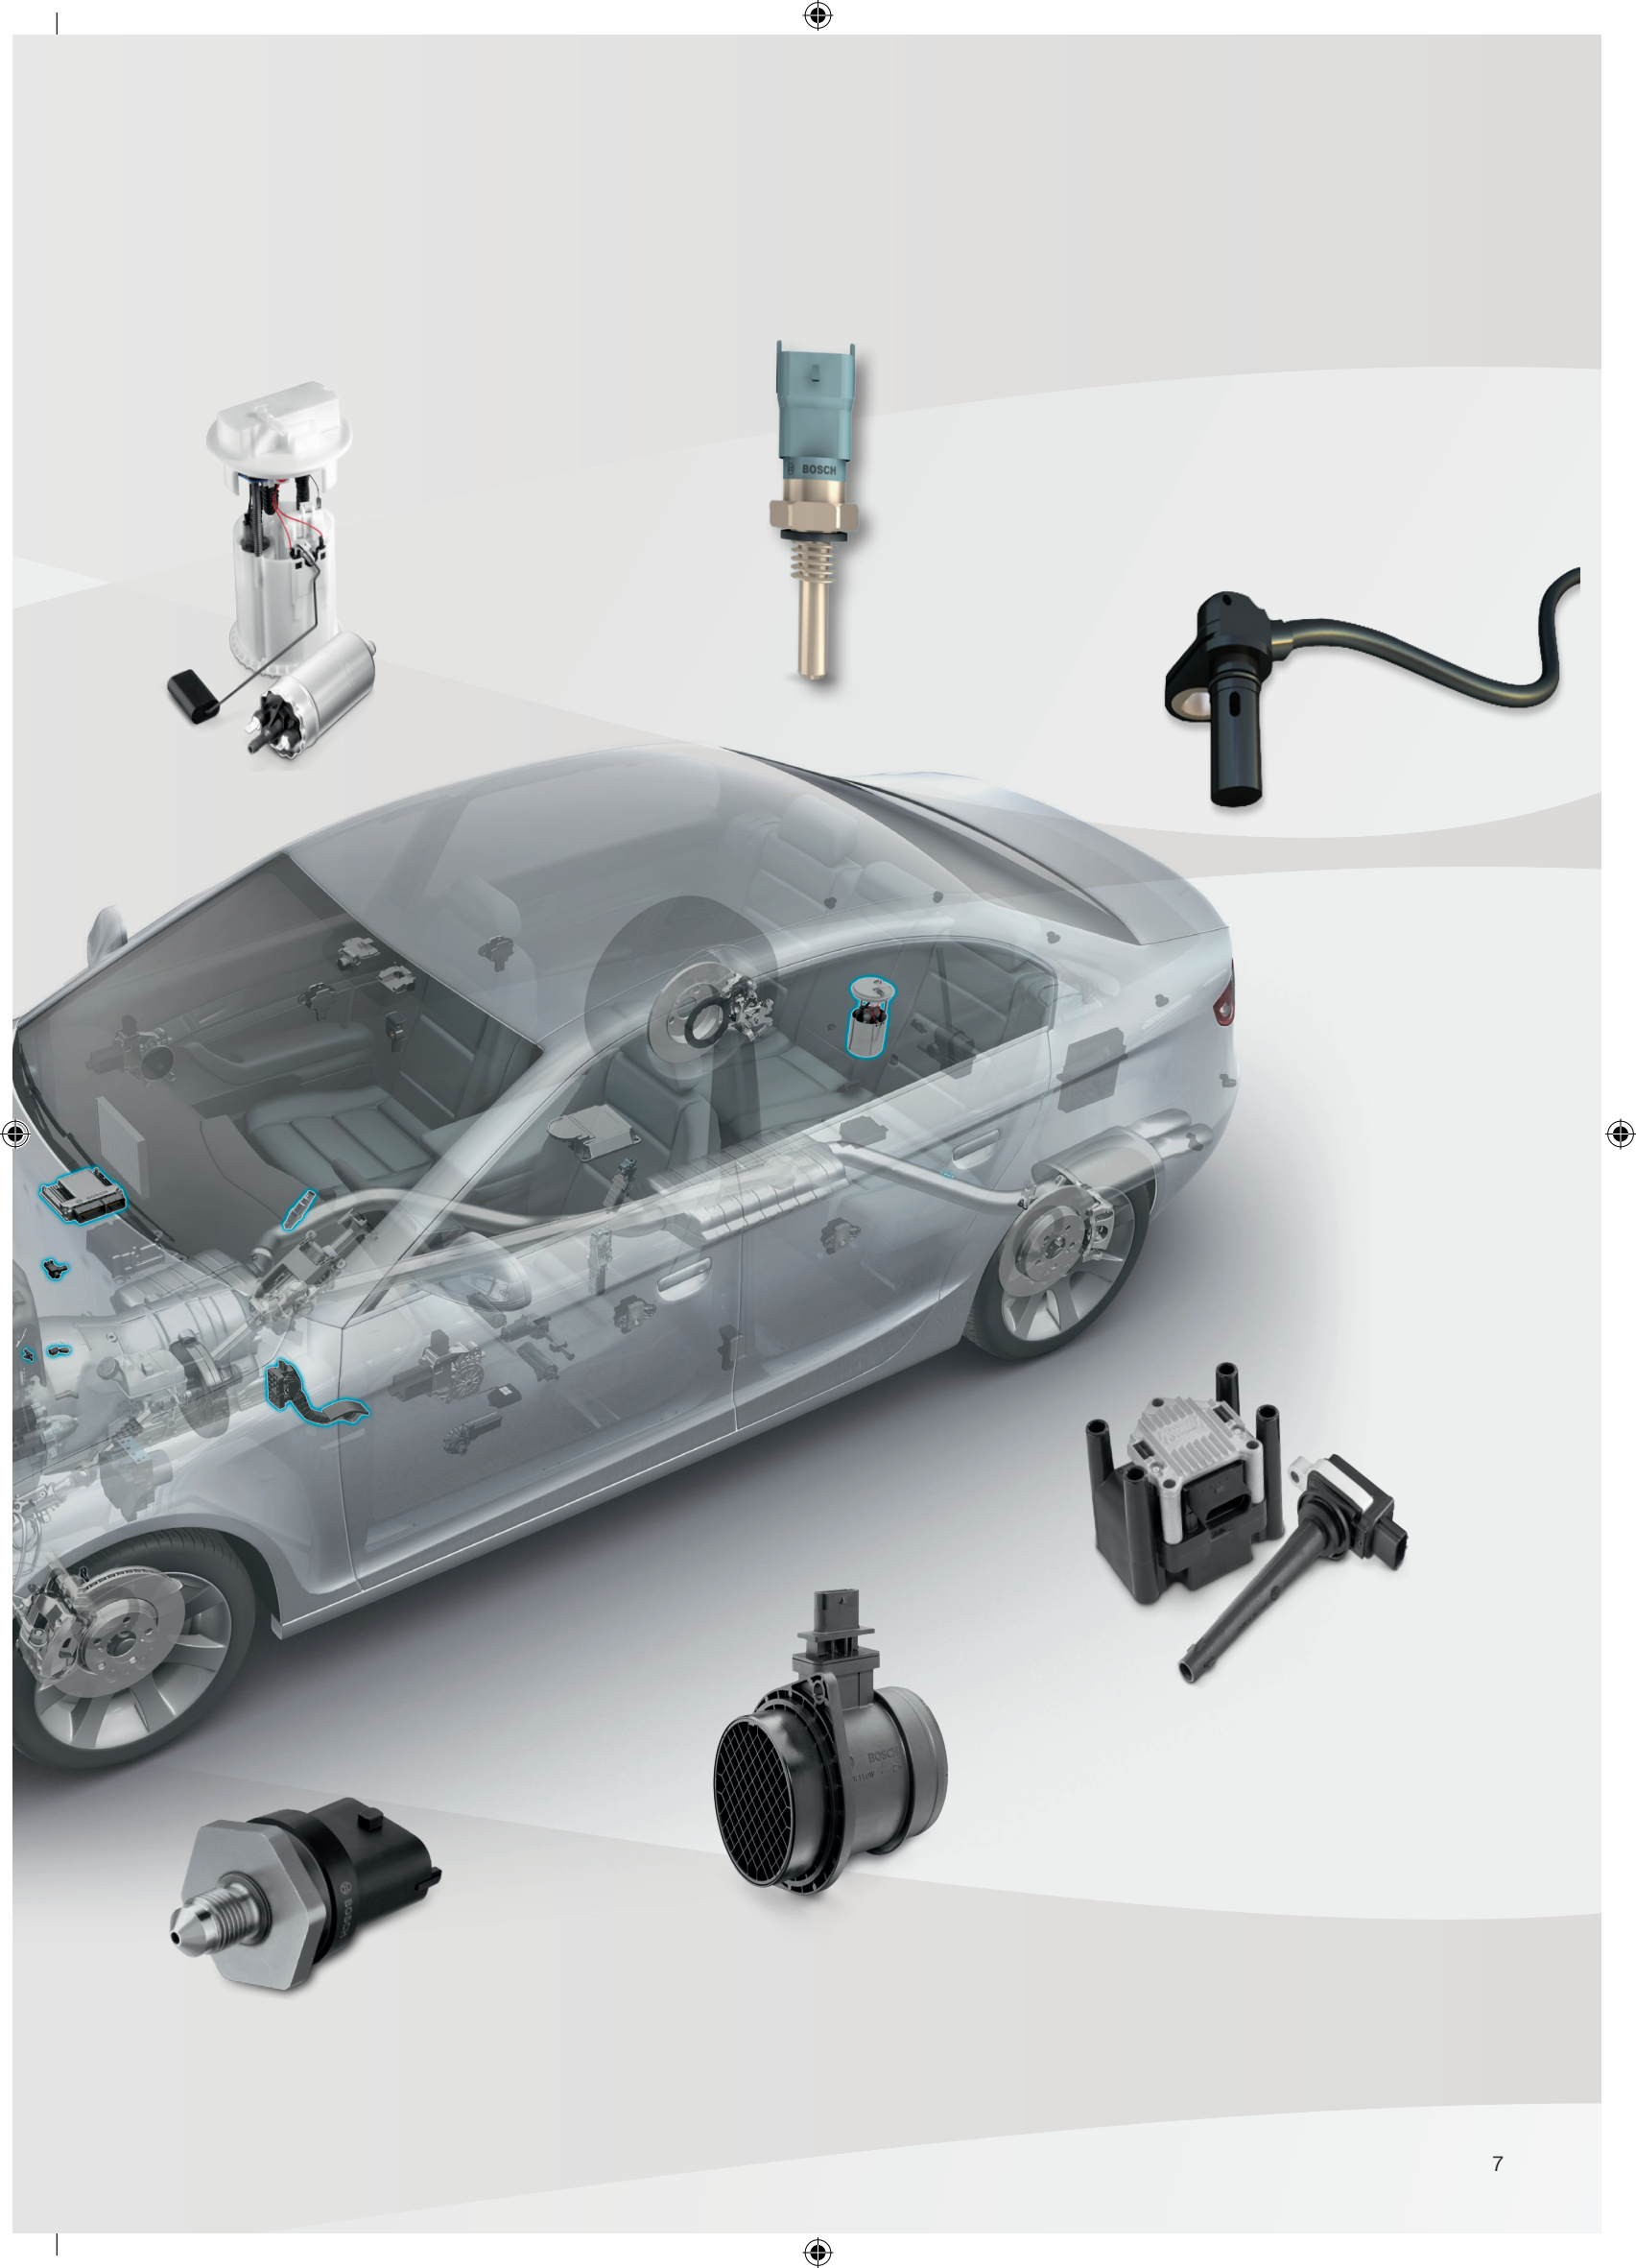

Bosch delivers a broad spectrum of products and services, including components and systems in the field of Gasoline Injection. In line with the requirements of emerging markets, Bosch Gasoline Systems offer proven Engine Management Systems and Components that help meet stringent norms and increase fuel economy.

This catalogue is prepared to broaden customers' insights into the wide range of products in Gasoline Systems, which Bosch offers in the Indian aftermarket segment. The products covered here are:

- |                            |  |
|----------------------------|--|
| ■ Electric Fuel Pump (EKP) | ■ Camshaft Sensor                          |
| ■ Ignition Cable           | ■ Knock Sensor                             |
| ■ Ignition Coil            | ■ Air Mass Meter                           |
| ■ Lambda Sensor            | ■ Temperature, Pressure, and Speed Sensors |
| ■ Crankshaft Sensor        |  |

# Gasoline injection

## Overview

**High-pressure injection valves and pumps are key components** of gasoline direct injection systems. Already back in 1954, a Mercedes-Benz race car equipped with a mechanical Bosch direct injection system won the Grand Prix in the French town of Reims. And even today, race cars with Bosch direct injection systems are still highly successful worldwide.

### Gasoline direct injection

Mobility is growing worldwide. At the same time, there is a strong desire to reduce fuel consumption and emissions. In this regard, gasoline direct injection is considered to be a key technology with huge potential. High system pressures – in racing even up to 500 bar – contribute to powerful and efficient engine performance. As more and more vehicles equipped with Bosch gasoline direct injection systems are launched onto the markets, the demand for reliable maintenance and repair is growing concomitantly.

### Gasoline manifold injection

The gasoline manifold injection system is one of the most widely used gasoline injection systems in the world. It stands out for its well-proven technology which will, in future, assume a key role based on innovative further developments.

### Future-proof

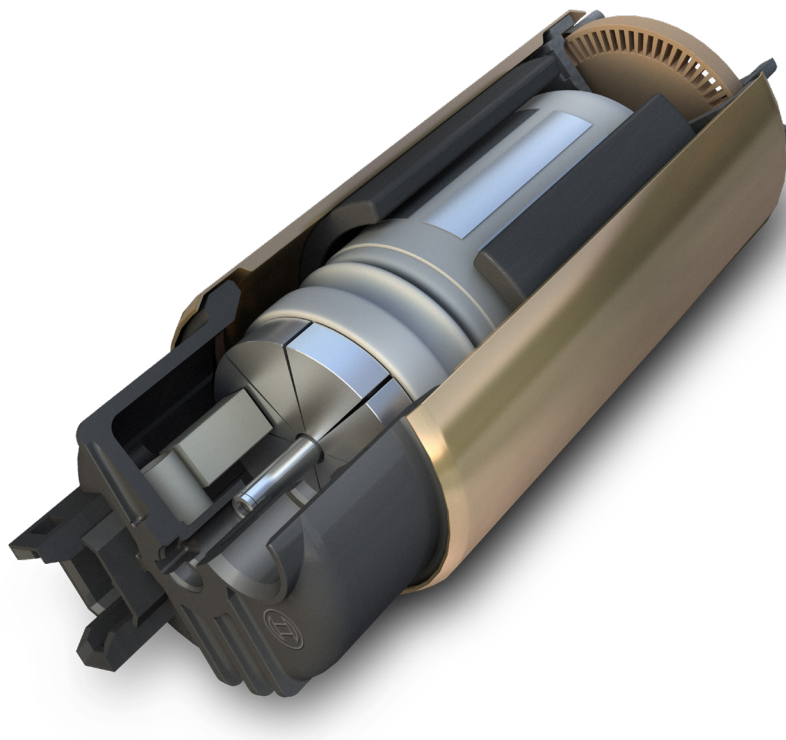

Bosch is working on a combination of gasoline manifold and direct injection systems in order to reduce the fuel consumption even further. This will allow compliance with new and coming emission regulations.

# Electric Fuel Pumps (EKP)

## Maximum Safety & Reliability

A fuel pump is the heart of the fuel supply system in a vehicle. It must provide maximum performance and reliability in every phase of operation. Electric Fuel Pumps in cars must satisfy very high requirements with respect to functionality, size, noise, emission, and service life. A fuel pump has to maintain the required fuel pressure under all operating conditions. It can be installed directly in the fuel tank (intank) or in the fuel line (inline).

## Features / Advantages

- Specific delivery of quantity and pressure as per OE requirements
- High level of interference suppression
- Very quiet operation
- Better resistance to corrosion in various fuel quality environments

## Benefits

- Maximum operational reliability
- Easy engine cold-start ensures long pump lifespan
- Increased driving comfort due to reduced noise
- Optimum fuel delivery
- Maximum reliability for hot gasoline delivery

# Ignition Cables

Bosch Ignition Cables offer protection against the harsh under-hood conditions generated by today's engines. With superior lifetime performance, Bosch ignition cables consistently transmit high voltage from the ignition coil to the distributor, and from the distributor to the spark plugs, thus providing:

- Improved mileage
- Quicker and easier starts
- Smoother idling and acceleration
- Reduced emissions

## Features

- Bosch cables have Class F type insulation
- Matched sets and individual leads
- External insulation of ignition leads is silicon
- PVC sleeves are not used
- Corrosion-resistant plug connectors giving reliable contact to spark plugs
- Outstanding interference suppression
- Extreme resistance to heat, cold, and liquids
- Optimum engine performance
- Protects engine and the catalytic converter as there is no misfiring

# Ignition Coils

The ignition coil provides ignition voltage. The induction principle is the basis for the ignition voltage between primary winding and secondary winding. The function of the ignition coil is the amplification of the magnetic field in the secondary windings. A primary voltage of 300 volts will be transformed to nearly 30,000 volts of secondary voltage. Defective ignition coils are recognised by the self-diagnosis of a vehicle or by a suitable engine tester.

## Features

- All ignition coils are of Original Equipment quality
- Specific matched values for ignition energy and ignition voltage
- Class F Silicon jacket – extremely good EMI suppression – safe operation
- Thermal, electrical, and chemical stability
- Stainless steel wire – inductive core technology
- Conductive ferrite coating and fibreglass

## Benefits

- Good responsiveness, optimum power development, and low exhaust emissions
- Outstanding interference suppression and insulation
- Corrosion-resistant and safe contact plug-in connections
- Extreme heat and cold resistance from 60°C to over 250°C
- Resists chemical and mechanical influences
- Protects engine and catalytic converter
- Temperature and shock resistance

# Sensors

## Overview

**Sensors, an important part of everyday workshop business:** No matter whether for motorsport or series applications, in order to improve driving dynamics and emission behavior, vehicles are equipped with more and more sensors. Testing, maintaining and repairing them are important sources of revenues for automotive workshops.

### Innovative technology

Bosch continuously develops innovative sensor solutions. The majority of the sensors are equipped with special micromechanical sensor elements. They measure extremely precisely and are also designed for a long service life. The test and production procedures for spare parts are the same as those used for original equipment.

### Huge experience – high quality

40 years of sensor development and production made Bosch one of the largest sensor manufacturers worldwide. Bosch sensors are perfectly geared to the respective type of vehicle and can be replaced easily.

### Complete range with high market coverage

Bosch provides a multitude of sensors for all kinds of motor vehicles. Thanks to continuous updates, the comprehensive range is always state of the art.

# Universal / Lambda Sensor

The lambda sensor, a Bosch invention, significantly contributes to the compliance of modern motor vehicles with the stringent legal emission standards and ensures an optimum air / fuel ratio.

The ready-to-fit and easy-to-install lambda sensor from Bosch determines the amount of oxygen in the exhaust gas and sends a signal to the ECU which adjusts the air-fuel mixture to the optimal level, thus preventing extensive damage to the catalytic converter. The sensors also provide up to 15% savings on fuel and also comply with stringent emission norms.

Lambda sensors, also known as oxygen sensors, are important emission control devices that assure compliance with the emission laws and protect the environment. For economic and environmental reasons, the functioning of the sensor should be checked at regular intervals and replaced, if necessary.

## Delivery Content of a Universal Sensor

- Lambda Sensor
- Universal Connector
- Installation Instructions

## Features

- Watertight
- Meets OE specifications
- Fits either 3-pole or 4-pole sensors
- Enables a simple connection to the wiring harness of the vehicle
- Provides a secure electrical connection (no soldering necessary)
- Bosch has developed a special connector, as soldering is not allowed with the lambda sensor
- Universal lambda sensors replace a wide range of original sensors

## Advantages

- Lambda sensors send a signal to the ECUs indicating the oxygen level in the exhaust system
- All Bosch Lambda Sensors are of OE quality
- High durability through resistance to environment influence (particularly water, salt, & oil) and totally submersible
- Mechanical and thermal stability
- Maintains compliance with all exhaust emission testing
- Easy installation, even by unskilled mechanics

# Crankshaft Sensor

For non-contact measurement of crankshaft rotation angle and speed.

## Features

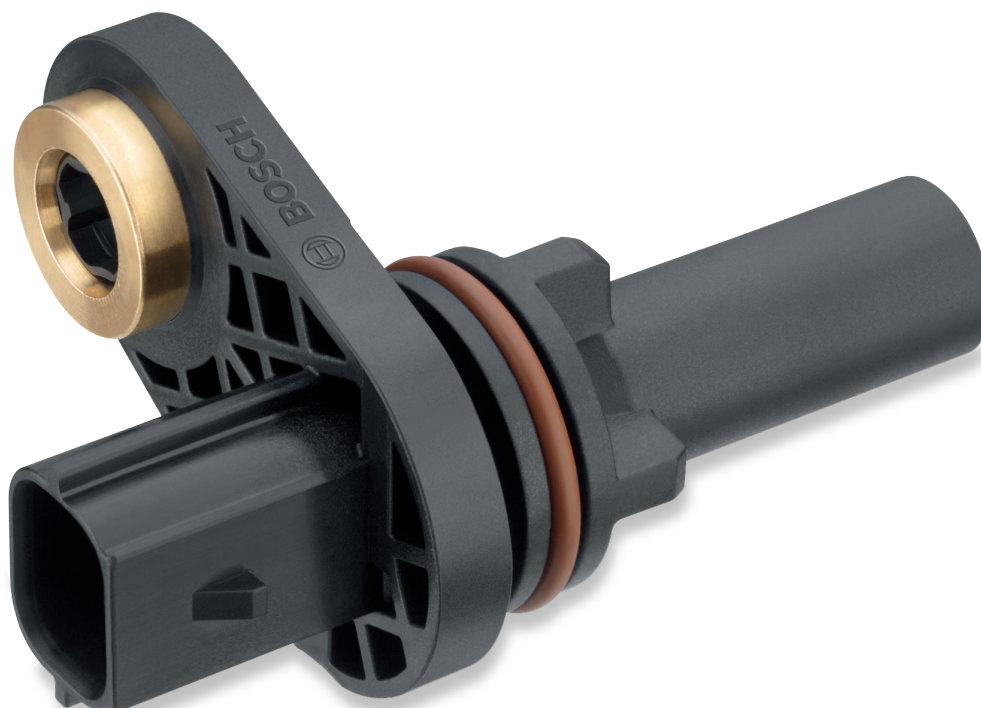

- Temperature range : -40°C–150°C
- Typical application : Crankshaft sensor with 60–2 teeth target
- Rotation speed range : 20–7000 min-1
- Output voltage : > 1650 mV (@416 rpm)
- Well-proven production processes

## Benefits

- Robust design
- Improved temperature shock stability
- Enlarged temperature range
- Reduced drift during lifetime
- Long lifetime > 300 Tkm
- All known requirements of new engine projects met
- Independent on installation position
- Contactless
- High resistance against external fields

# Camshaft Sensor

For non-contact measurement of camshaft rotation angle.  
They are fitted directly to the camshaft.

## Features

- Single-hall technology
- True power on (TPO) function
- Twist Insensitive Mounting (TIM)
- Temperature range until 150°C (max. 250 h at +160°C)
- Small sensor diameter 11.3 mm (PG-3.9)

## Benefits

- High accuracy
- Wide air gap range
- Small packaging size and functional diameter
- High EMC / ESD protection
- Low current consumption
- Resistant to mineral oil products

# Knock Sensor

Knocking can permanently damage an engine. Knock sensors fitted directly to the engine block, record structure-borne sound (knocking) in the engine and transfer this data to the engine management system. These values are then used to counteract the problem and ensure smoother combustion. This results in improved efficiency and longer service life.

## Features

- Broadband type, 5 to 22 kHz
- Linear characteristics over large frequency range
- 30mV/g at 5 kHz, active output
- Standard version: -40°C–130°C
- Extended heat version: -40°C–150°C

## Benefits

- Fuel consumption reduction up to 9%
- Torque increase up to 5%
- Engine protection
- Enables use of multiple quality fuels with various anti-knock properties
- No audible knocking

# Air Mass Meter / Hot-film Air Mass Meter

Quick and precise measurement of the actual air flow for a reliable and accurate mixture formation.

The air mass meter is located between the air filter and throttle valve, and measures the air mass flow through the induction manifold. An electrically heated, thin platinum wire film resistance with a temperature sensor is inserted into the induction manifold air flow. The ECU receives a voltage signal which is proportional to the air mass flow, from which the control unit calculates the necessary quantity of fuel.

## **Bosch air mass meters are characterized by:**

- Compact design
- Low weight
- Fast response time
- Low power input
- Return flow detection

## **Features / Benefits**

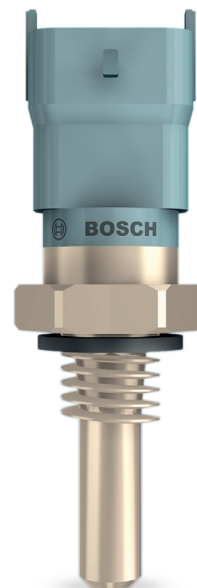

- Model-specific application leads to best engine characteristics, low fuel consumption, and low pollutant emissions
- Latest hybrid technology / microelectronic, therefore high accuracy on air mass measurement
- Precise sensing and evaluation of signals
- Optimum driving response
- Response within a short time span

# Temperature, Speed, and Pressure Sensors

Temperature sensors monitor the temperature of coolant, oil, and air, and transfer the data to the engine management system. Depending on the application, the sensors may be installed on the engine block, cooling circuit, or air intake system.

Bosch Rotation Speed Sensors are used to record an extremely wide variety of measurement data. The information they supply is used by transmission, engine, navigation, and running-gear control systems.

Micromechanical pressure sensors are predominantly used to measure atmospheric pressure. They supply the engine management system with reliable values to ensure that the engine runs with the appropriate air / fuel ratio. Bosch pressure sensors have extremely fast response times and operate very reliably and accurately.

Model Description	Product Description	Additional Information	Part Number	MRP (₹)
E 200 (1998.01 -2000.02)	Air Mass Meter	For vehicles with closed-loop catalytic converter	0 280 217 114	7,328.00
E 200 (1998.01 -2000.02)	Air Mass Meter	For vehicles with open-loop catalytic converter	0 280 218 411	On Request
E 200 (1998.01 -2000.02)	Crankshaft Sensor	For vehicles with manual transmission	0 261 210 170	1,681.00
E 200 (1998.01 -2000.02)	Crankshaft Sensor	For vehicles with automatic transmission	0 261 210 170	1,681.00
E 200 (1998.01 -2000.02)	Crankshaft Sensor	For vehicles with automatic transmission	0 281 002 123	On Request
E 200 (1998.01 -2000.02)	Crankshaft Sensor	For vehicles with manual transmission	0 281 002 123	On Request
E 200 (1998.01 -2000.02)	Lambda Control Sensor		0 258 003 893	On Request
E 200 (2012.08 -2016.08)	Air Mass Meter		0 280 218 275	5,772.00
E 200 (2012.08 -2016.08)	Lambda Control Sensor		0 258 017 345	On Request
E 200 4MATIC	Camshaft Sensor		0 232 103 125	3,419.00
E 200 4MATIC	High-pressure Injector, Gdi		0 261 500 804	9,727.00
E 200 4MATIC	High-pressure Pump, Gdi		0 261 520 705	On Request
E 200 4MATIC (2019.06-->)	Knock Sensor	Without harness, For German vehicle production	0 261 231 290	On Request
E 200 4MATIC (2019.06-->)	Knock Sensor	With harness	0 261 231 328	On Request
E 220 CDI	Boost Pressure Sensor		0 261 230 439	On Request
E 220 CDI	Camshaft Sensor		0 232 103 107	3,419.00
E 220 CDI	Intake Manifold Pressure Sensor		0 261 230 189	On Request
E 220 CDI	Pressure Sensor, Exhaust Gas		0 281 006 278	1,865.00
E 220 CDI	Throttle Valve Assembly		0 280 750 573	7,295.00
E 220 CDI (1999.08 -2002.03)	Air Mass Meter		0 281 002 152	On Request
E 220 CDI (1999.08 -2002.03)	Crankshaft Sensor		0 261 210 170	1,681.00
E 220 CDI (1999.08 -2002.03)	Crankshaft Sensor		0 281 002 123	On Request
E 220 CDI (2002.03 -2006.03)	Air Mass Meter		0 281 002 535	8,416.00
E 220 CDI (2002.03 -2006.03)	Crankshaft Sensor		0 261 210 170	1,681.00
E 220 CDI (2002.03 -2006.03)	Fuel Level Sensor Module, Saddle Tank, Passive		1 582 881 056	On Request
E 220 CDI (2002.03 -2006.03)	Lambda Control Sensor	For LHD vehicles	0 258 017 020	On Request
E 220 CDI (2002.03 -2006.03)	Temperature Sensor, Exhaust Gas	For LHD vehicles	0 986 259 026	On Request

## Passenger Cars

Model Description	Product Description	Additional Information	Part Number	MRP (₹)
E 220 CDI (2008.12 -2014.12)	Crankshaft Sensor	For vehicles without Start-Stop function	0 261 210 170	1,681.00
E 220 CDI (2008.12 -2014.12)	Crankshaft Sensor	For vehicles without Start-Stop function, For vehicles with manual transmission	0 261 210 170	1,681.00
E 220 CDI (2008.12 -2014.12)	Crankshaft Sensor	For vehicles without Start-Stop function, For vehicles with automatic transmission	0 261 210 170	1,681.00
E 220 CDI (2008.12 -2014.12)	Fuel Level Sensor Module, Saddle Tank, Passive	Left side mounting	0 986 580 397	On Request
E 220 CDI (2008.12 -2014.12)	Fuel Supply Module	Right side mounting, For vehicles with auxiliary heater, With regulated fuel pump	0 986 580 394	On Request
E 220 CDI (2008.12 -2014.12)	Fuel Supply Module	Right side mounting, For vehicles without auxiliary heater, With regulated fuel pump	0 986 580 395	On Request
E 220 CDI (2008.12 -2014.12)	Lambda Control Sensor	For vehicles without Start-Stop function	0 258 017 108	7,295.00
E 220 CDI (2008.12 -2014.12)	Lambda Control Sensor	For vehicles with Start-Stop function	0 281 004 207	6,101.00
E 220 CDI (2008.12 -2014.12)	Temperature Sensor, Exhaust Gas	Fitted in particulate filter, For LHD vehicles	0 986 259 005	5,674.00
E 220 CDI (2008.12 -2014.12)	Temperature Sensor, Exhaust Gas	In front of the turbocharger	0 986 259 012	5,512.00
E 220 d	Intake Manifold Pressure Sensor		0 261 230 506	On Request
E 220 d	Particulate Sensor		0 281 007 095	On Request
E 230	Air Pump, Emission Control	In case of secondary-air pump overheating we recommend to replace the relay	0 580 000 025	On Request
E 230	Camshaft Sensor		0 232 103 114	2,137.00
E 230	Connector, Suppressed, Ignition Coil	Long design	0 356 100 100	On Request
E 230	Connector, Suppressed, Spark Plug		0 356 150 022	On Request
E 230	Crankshaft Sensor		0 281 002 123	On Request
E 230	Electric Fuel Pump, In-line		0 580 254 049	On Request
E 230	Ignition Cable Set		0 986 356 311	On Request
E 230	Ignition Coil		0 986 221 058	4,958.00
E 230	Intake Manifold Pressure Sensor		0 261 230 189	On Request
E 230	Knock Sensor		0 261 231 188	On Request
E 230	Lambda Diagnostic Sensor		0 258 006 749	On Request

## Passenger Cars

Model Description	Product Description	Additional Information	Part Number	MRP (₹)
E 230	Pressure Regulator, Injection System		0 280 160 587	On Request
E 230	Throttle Valve Assembly		0 280 750 017	On Request
E 230	Universal Lambda Control Sensor	Additional installation work required	0 258 986 506	2,871.00
E 230	Universal Lambda Diagnostic Sensor	Additional installation work required	0 258 986 602	3,126.00
E 230 (1995.06 -1997.08)	Air Mass Meter	For vehicles with closed-loop catalytic converter	0 280 217 114	7,328.00
E 230 (1995.06 -1997.08)	Air Mass Meter	For vehicles with open-loop catalytic converter	0 280 218 411	On Request
E 230 (2007.09 -2009.03)	Air Mass Meter		0 280 218 190	6,193.00
E 240	Air Mass Meter	For vehicles with closed-loop catalytic converter	0 280 217 515	On Request
E 240	Air Mass Meter		0 280 217 515	On Request
E 240	Air Pump, Emission Control	In case of secondary-air pump overheating we recommend to replace the relay	0 580 000 010	On Request
E 240	Ignition Cable For Cylinder 2	Slightly differing specification from Silicone Copper	0 356 912 948	On Request
E 240	Ignition Cable For Cylinder 5	Slightly differing specification from Silicone Copper	0 356 912 948	On Request
E 240	Ignition Coil		0 221 503 035	2,931.00
E 240	Intake Manifold Pressure Sensor		0 261 230 189	On Request

## Passenger Cars

Model Description	Product Description	Additional Information	Part Number	MRP (₹)
ML 350 4MATIC	Air Mass Meter		0 280 218 190	6,193.00
ML 350 4MATIC	Air Pump, Emission Control	In case of secondary-air pump overheating we recommend to replace the relay	0 580 000 025	On Request
ML 350 4MATIC	Camshaft Sensor		0 232 103 114	2,137.00
ML 350 4MATIC	Ignition Coil		0 986 221 058	4,958.00
ML 350 4MATIC	Intake Manifold Pressure Sensor		0 261 230 189	On Request
ML 350 4MATIC	Knock Sensor		0 261 231 188	On Request
ML 350 4MATIC	Throttle Valve Assembly		0 280 750 017	On Request
ML 350 4MATIC	Universal Lambda Diagnostic Sensor	Additional installation work required	0 258 986 602	3,126.00
ML 350 4MATIC (2005.09 -2011.06)	Lambda Diagnostic Sensor	Left side mounting	0 258 006 747	On Request
ML 350 4MATIC (2005.09 -2011.06)	Lambda Diagnostic Sensor	Right side mounting	0 258 006 749	On Request
ML 350 BlueTec 4MATIC	Boost Pressure Sensor		0 261 230 193	2,304.00
ML 350 BlueTec 4MATIC	Camshaft Sensor		0 232 103 160	On Request
ML 350 BlueTec 4MATIC	Intake Manifold Pressure Sensor		0 261 230 189	On Request
ML 350 BlueTec 4MATIC	Lambda Control Sensor		0 281 004 207	6,101.00
ML 350 BlueTec 4MATIC	Particulate Sensor		0 281 007 902	17,832.00
ML 350 BlueTec 4MATIC	Pressure Sensor, Exhaust Gas		0 281 006 213	2,043.00
ML 350 BlueTec 4MATIC	Temperature Sensor, Exhaust Gas	Installed in front of the catalytic converter	0 986 259 025	On Request
ML 350 BlueTec 4MATIC	Throttle Valve Assembly		0 281 002 894	10,982.00
ML 63 AMG 4MATIC	Boost Pressure Sensor		0 261 230 228	On Request
ML 63 AMG 4MATIC	High-pressure Injector, Gdi		0 261 500 804	9,727.00
ML 63 AMG 4MATIC	Ignition Coil	The product fitted must be identified on the vehicle or engine	0 221 604 067	On Request
ML 63 AMG 4MATIC	Intake Manifold Pressure Sensor		0 261 230 506	On Request
ML 63 AMG 4MATIC	Lambda Diagnostic Sensor		0 258 986 774	On Request
ML 63 AMG 4MATIC	Throttle Valve Assembly		0 280 750 514	On Request
ML 63 AMG 4MATIC (2011.08 -2015.08)	High-pressure Pump, Gdi	Left side mounting	0 261 520 219	On Request
ML 63 AMG 4MATIC (2011.08 -2015.08)	High-pressure Pump, Gdi	Right side mounting	0 261 520 221	On Request
ML 63 AMG 4MATIC (2011.08 -2015.08)	Lambda Control Sensor		0 258 017 014	On Request
ML 63 AMG 4MATIC (2011.08 -2015.08)	Lambda Control Sensor		0 258 017 339	On Request
ML 63 AMG 4MATIC (2014.05 -2015.08)	High-pressure Pump, Gdi	Left side mounting	0 261 520 219	On Request

## Passenger Cars

Model Description	Product Description	Additional Information	Part Number	MRP (₹)
ML 63 AMG 4MATIC (2014.05-2015.08)	High-pressure Pump, Gdi	Right side mounting	0 261 520 221	On Request

Astra 1.6i	Electric Fuel Pump, In-tank With Parts Kits		0 580 314 154	On Request
Astra 1.6i	Ignition Cable, Ignition Coil - Ignit. Distributor		0 986 356 090	On Request
Astra 1.6i	Intake Manifold Pressure Sensor		F 000 99P 169	2,205.00
Astra 1.6i	Lambda Control Sensor		F 00H L00 311	1,450.00
Astra 1.6i	Temperature Sensor, Coolant		0 280 130 107	On Request
Astra 1.6i	Throttle Valve Sensor		F 000 99S 003	On Request
Astra 1.6i	Universal Lambda Control Sensor	Additional installation work required	0 258 986 501	2,076.00
Astra 1.6i (1997.09 -1998.02)	Ignition Cable Set		0 986 357 124	On Request
Astra 1.6i (1997.09 -1998.02)	Ignition Cable Set		0 986 357 226	On Request
Corsa 1.4i	Crankshaft Sensor		F 000 99R 005	2,129.00
Corsa 1.4i	Intake Manifold Pressure Sensor		F 000 99P 169	2,205.00
Corsa 1.4i	Universal Lambda Control Sensor	Additional installation work required	0 258 986 602	3,126.00
Corsa 1.4i (2000.01 -2005.12)	Electric Fuel Pump, In-tank		0 580 453 471	On Request
Corsa 1.4i (2000.01 -2005.12)	Electric Fuel Pump, In-tank		0 580 454 093	2,036.00
Corsa 1.4i Sail Hatchback	Crankshaft Sensor		F 000 99R 005	2,129.00
Corsa 1.4i Sail Hatchback	Electric Fuel Pump, In-tank		F 01R 00R 011	On Request
Corsa 1.4i Sail Hatchback	Intake Manifold Pressure Sensor		F 000 99P 169	2,205.00
Corsa 1.4i Sail Hatchback	Universal Lambda Control Sensor	Additional installation work required	0 258 986 602	3,126.00
Corsa 1.4i Swing Hatchback	Crankshaft Sensor		F 000 99R 005	2,129.00
Corsa 1.4i Swing Hatchback	Intake Manifold Pressure Sensor		F 000 99P 169	2,205.00
Corsa 1.4i Swing Hatchback	Lambda Control Sensor		F 00H L00 428	6,160.00
Corsa 1.4i Swing Hatchback (2001.07 -2003.09)	Electric Fuel Pump, In-tank		0 580 453 471	On Request

## Passenger Cars

Model Description	Product Description	Additional Information	Part Number	MRP (₹)

## Notes

# What drives you, drives us

Bosch technologies are used in most vehicles worldwide.  
People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated over 130 years of pioneering spirit  
and expertise in research and manufacturing to achieving this.

We provide the aftermarket and workshops worldwide with modern diagnostic  
and workshop equipment and a wide range of spare parts for passenger cars and  
commercial vehicles:

- Solutions for efficient vehicle repairs
- Innovative workshop equipment and software
- One of the world's most comprehensive ranges of new and exchange parts
- Large network of wholesale customers, for quick and reliable parts supply
- Competent hotline support
- Comprehensive educational and training offers
- Targeted sales and marketing support
