

Driven by **POWER**

Bosch batteries

Application chart 2020/21

BOSCH

Invented for life

SM Mega Power

Calcium technology for reliable starting power

The electrical demand on the modern-day vehicle is rising due to the increasing number of electronic devices for safety and comfort. Bosch SM Mega Power meets this increased energy demand across a wide range, from compact to commercial vehicles.

- ▶ Long service life with minimum water loss
- ▶ Expanded grid technology delivers optimal power to add-on electronics and devices
- ▶ Labyrinth lid design and flame arrestor for enhanced safety

SM Mega Power Silver

Silver technology for optimal performance

Bosch SM Mega Power Silver is the dependable powerhouse to meet the high energy demands of recent or upmarket vehicles that are equipped with numerous electronic safety and comfort features. Bosch's innovative grid technology prolongs the battery's performance over time.

- ▶ Approximately 30% higher starting power compared to standard batteries
- ▶ Reliable starting power under extreme temperatures
- ▶ Excellent corrosion resistance for increased service life
- ▶ Labyrinth lid design and flame arrestor for enhanced safety

AM Hightec Silver AMS

The right power for Alternator Management System (AMS)

For vehicles equipped with Alternator Management System (AMS), the technology monitors the vehicle's operating condition and battery's state of charge to ensure an optimized charge. It varies the alternator's power delivery to the battery according to the current operating conditions, which relieves the engine's workload. The result is a reduction in fuel consumption and emission.

Bosch AM Hightec Silver AMS battery has higher charge acceptance and characteristic to withstand the cyclic demands of AMS. Installing a conventional flooded battery in an AMS vehicle may shorten the battery's expected life span.

ST Hightec EFB

Enhanced performance for entry-Level Start-Stop

Bosch ST Hightec EFB (Enhanced Flooded Battery) is built for higher performance than conventional flooded batteries to meet the requirements of vehicles with an entry-level Start-Stop feature. Also recommended for standard vehicles with high electrical demands.

EFB technology provides double the cyclic stability with high endurance from deep discharges.

- Designed for vehicles with entry-level Start-Stop feature
- Extended cycle life compared to conventional flooded battery
- High charge acceptance for consistent performance and delivering extra power when needed

ST Hightec AGM

AGM technology for advanced Start-Stop systems

Start-Stop technology is rapidly gaining momentum as a vehicle feature to reduce fuel consumption and CO2 emission. In city traffic where opportunities to charge the battery is lesser, the vehicle's electrical system can be consuming more power than the alternator can supply. Bosch ST Hightec AGM is able to recharge quickly, delivering superior power to restart the engine.

In city traffic, the vehicle's electrical system can consume more power than the alternator can supply. Due to less charging opportunity in start-stop systems, it is crucial to have a battery that is able to recharge quickly with superior starting power to enable engine off-mode.

Application Chart

For exact fitment, always check specifications against original battery prior to installation.

Auxiliary

Segmentation	AGM
Application Characteristics	Mercedes Benz with dual battery system. Provides backup power in case of emergency
Technology	Absorbent Glass Mat (AGM) ★★★★★
Benefits	AGM technology offers long service life and is highly resilient to deep discharges
Maintenance Free	✓

AGM Auxiliary

Reliable energy for your Mercedes-Benz

For Mercedes-Benz vehicle models equipped with a dual-battery system, the Bosch AGM Auxiliary battery is the secure choice of backup power supply in case of inadequate energy from the main battery or an alternator failure.

Bosch Auxiliary Battery is the power within the car system to provide reliable energy support and safety assurance for Mercedes-Benz owners.

Application Chart

For exact fitment, always check specifications against original battery prior to installation.

Bosch P/N #	Short Code	OE Number	Dimensions	Application

	Mega Power	Mega Power Silver	Hightec Silver AMS	Hightec EFB	Hightec AGM	Mega Power (Dry Charged)
Segmentation	SM	SM	AM	ST	ST	SD
Application Characteristics	Standard vehicles with additional electronic devices	Modern vehicles with sophisticated built-in electronic features	Vehicles with Alternator Management System	Vehicles with entry-level Start-Stop technology	Vehicles with AGM as original equipment (OE) battery. Relevant for most Start-Stop engines with regenerative braking	Economic option for both passenger and commercial vehicles with basic energy requirements
Technology	Calcium-Calcium ★★	Calcium-Silver ★★★	Alternator Management System (AMS) ★★★★	Enhanced Flooded Battery (EFB) ★★★★	Absorbent Glass Mat (AGM) ★★★★★	Lead Anti-mony ★
Benefits	High starting power with minimum water loss	Excellent corrosion resistance for increased service life	High charge acceptance with enhanced durability to withstand frequent charge and discharge cycles	Extended cycle life with optimized power	Higher recharging capacity and up to 3 times cyclic endurance than conventional battery	Excellent heat resistance, suitable for hot environments
Maintenance Free	✓	✓	✓	✓	✓
