Rear wiper blades
improved rear view in traffic

bosch-automotive-aftermarket.com

What drives you, drives us.

BOSCH

Invented for life

Rear wiper blades

Clear visibility of rear traffic

Under adverse weather conditions, maintaining clear visibility of the rear is just as important as the view of the front, be it while in traffic or when reversing into a parking space. Bosch rear wiper blades deliver the best possible wiping results with long service life as you would expect of any Bosch wiper blade.

Be safe, and maintain vision clarity with Bosch wipers.

High quality, high coverage

- ▶ Maintain clear rear visibility under any weather condition
- ▶ Best wiping performance thanks to innovative wiper rubber technology
- ▶ Smooth and quiet wiper operation
- ▶ Quick and easy fitting
- ▶ Complete range comprising Aerotwin flat blade, plastic design, and conventional standard wiper technologies
- ▶ Over 95% market coverage

Bosch offers a wide range of rear wiper blades, achieving more than 95 % of market coverage.

1. Aerotwin flat wiper blade

Power Protection Plus rubber coating delivers perfect wiping performance and longer service life

2. Plastic design wiper blade

Resemble and fit most vehicles' original equipment specifications

3. Standard metal bracket wiper blade

Robust metal bracket for high stability and resilience

Rear technology at a glance:

1. Aerotwin flat wiper blade

The *Aerotwin* achieves the best wiping results ever. Two parallel, high-tech Evodium steel spring strips distribute the contact pressure of the wiper arms evenly across the entire length of the wiper blade, creating a smooth and uniform wipe every time. Its wiper rubber is coated with Power Protection Plus, an innovative and patented technology that makes this flat blade tougher, smoother, and quieter than ever before.

2. Plastic design rear wiper blades

Bosch's plastic design wiper blades are developed to resemble the familiar shape of most vehicle's original equipment. Aside from exceptional wiping performance, they are also easy to install thanks to the vehicle-specific joint type already integrated into the wiper blade.

3. Standard wiper blades with metal bracket

These wiper blades perform particularly well based on the proven standard wiper blade technology. Its robust metal bracket system and wiper rubber's micro twin edge make it extremely resilient while ensuring smooth and quiet wiping. They are available as standard types with pre-assembled adapter and as a vehicle-specific full-metal solution.
