What drives you, drives us.

BOSCH

Invented for life

Wiper blades for trucks and buses

Top performance in tough conditions

Buses and trucks are constantly on the road and often cover long distances at a time. When faced with harsh weather conditions, visibility of the road becomes the utmost safety concern. Bosch delivers the best possible visibility under any weather condition for large windshields with its conventional *Twin* standard and *Aerotwin* flat wiper blades. **Be safe, and maintain vision clarity with Bosch wipers.**

High quality, high coverage

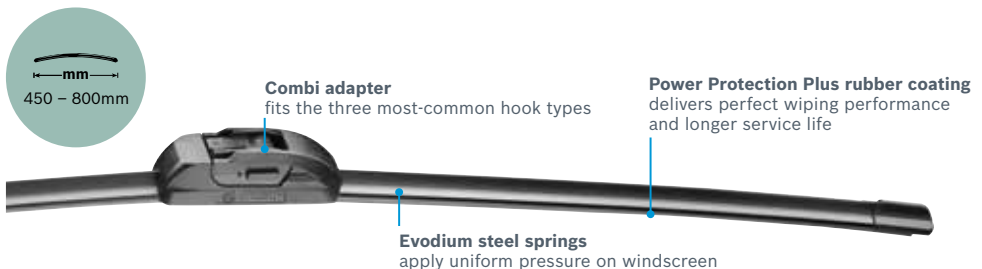

- ▶ Maintain clear visibility under any weather condition
- ▶ Quiet wiping performance
- ▶ Quick and easy fitting
- ▶ Complete range comprising *Aerotwin* flat blade and *Twin* conventional blade technologies

Aerotwin flat wiper blades

The *Aerotwin* achieves the best wiping results ever. Two parallel, high-tech Evodium steel spring strips distribute the contact pressure of the wiper arms evenly across the entire length of the wiper blade, creating a smooth and uniform wipe every time. Even oncoming head- or cross-winds will have little effect on wiping performance, thanks to its aerodynamic wind spoiler designed to prevent the wiper blade from lifting off the windshield. *Aerotwin*'s wiper rubber is coated with Power Protection Plus, an innovative and patented technology that makes this flat blade tougher, smoother, and quieter than ever before.

Best wiping performance with lowest noise

-  Perfect wiping for maximum windscreen clarity
-  Evenly-distributed pressure to minimize juddering or smears
-  Extremely smooth and quiet
-  High durability, long service life
-  Very easy fitting for all common wiper arm types

Twin standard wiper blades

The trusted design of the *Twin* standard wiper blade delivers high wiping performance even in bad weather conditions. Its robust metal bracket system and wiper rubber's micro twin edge make it extremely resilient while ensuring smooth and quiet wiping. The *Twin*'s proven technology delivers clear visibility of the road that is consistent and free from smears throughout its entire service life.

Trusted and reliable performance

-  Consistent wiping performance
-  Quiet and smooth wiping
-  Durable construction and materials
-  Quick and easy fitting
-  Up to 90% market coverage for commercial vehicles and buses

Robust metal bracket
for high stability and resilience

Patented wiper rubber material
for superior cleaning and quiet wiping

up to 1,000mm

Micro twin edge
increases wear-resistance and
protects against corrosion
