

# The new ACS units range for R134a and R1234yf: Bosch's A/C solutions to simplify day-to-day business for your workshop

With its new ACS units range, Bosch makes the maintenance operations of the AC R134a and R1234yf systems easier and more efficient. These ACS units integrate all maintenance functions, whether routine or extraordinary. All functions are easily controlled and managed by the operator, thanks to an innovative graphical user interface (7" wide colour display) placed on a swiveling control console and a smartphone app allowing the user to check the ACS equipment status in real time. Contextual shortcut help messages support and guide the user through the operations.

Focusing on user centric workshop solutions the unit was designed based on a modular approach providing also easy access to internal components. This reduces the need for maintenance service as well as service time. The innovative and exclusive 'Deep Recovery' function makes refrigerant recovery fast and efficient and allows the operator to recover 99% of the refrigerant from the vehicle. Thanks to the dual-stage vacuum pump, with the highest flow rate of the equipment market (170 l / min), you achieve faster and, most of all, deeper dehydration of the A/C system. Reliability and precision of charge (± 15 grammes) of the refrigerant is assured by an integrated system of temperature and pressure control. The danger of crosscontamination (PAG / POE) of lubricants is avoided thanks to the independent oil injection system, user-fillable sealed bottles and the flushing cycle of the service hoses, which is automated at every oil change.

Design-for-service guarantees quick and easy access to internal components

Embedded and automatic leak test with  $N_2H_2/N_2$ 

Flushing kit approved by car manufacturers

### ACS 863 / ACS 763

### The best in class in R1234yf air conditioning service units

R1234yf completely fully automatic service units meet the highest requirements for servicing air conditioning units in cars and commercial vehicles. Compatible with hybrid A/Csystems meeting German car manufacturer specifications, SAE and European standards.

- ► Embedded refrigerant identifier (ACS 863)
- ▶ 99 % recovery rate (Deep Recovery)
- ► Mobile app
- ► N<sub>2</sub>H<sub>2</sub>/N<sub>2</sub> leak test embedded

Order number ACS 863: SP00000112 ACS 763: SP00000113

#### **ACS 753**

### The new reference for R134a air conditioning service units

R134a completely fully automatic unit meets the highest requirements for servicing air conditioning units in cars and commercial vehicles. Compatible with hybrid A/C systems meeting the SAE J2788 and European standards.

- ▶ 99 % recovery rate (Deep Recovery)
- ► Mobile app
- ► N<sub>2</sub>H<sub>2</sub>/N<sub>2</sub> leak test embedded

Order number ACS 753: SP00000110

### Benefits for your workshop at a glance

- ► Swivelling control console ensures optimal human interface experience
- ➤ Design-for-service for the easiest and most effective ACS internal maintenance
- ► Smartphone app enables remote communication of ACS unit at your fingertips
- ► Integrated leak detection system for inert gas (NOx, nitrogen, formiergas)

- ► Deep Recovery function allows full empting of the MAC system
- ► Innovative oil bottle system suitable for vehicles with combustion engines and hybrid vehicles (PAG/POE)
- ► Developed based on customer experience using ACS units, resulting in a product with the perfect balance between robustness and manoeuvrability

## ACS 863, ACS 763 und ACS 753 Technical data, primary functions

Functions	ACS 863	ACS 763	ACS 753
Operating mode	Fully automatic and single function	Fully automatic and single function	Fully automatic and single function
Refrigerant	R1234yf	R1234yf	R1234yf or R134a
Refrigerant recovery	Automatic	Automatic	Automatic

### Driven by Efficiency

Bosch technologies are used worldwide in almost all vehicles. People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated the last 125 years of pioneering spirit and expertise in research and manufacturing to achieving this.

We continue to work on our unique combination of solutions for spare parts, diagnostic devices, workshop equipment and services:

- ► Solutions for efficient vehicle repairs
- ▶ Innovative workshop equipment and software
- ► The world's most comprehensive range of new and replacement parts
- ► Large network of wholesale customers, for quick and reliable parts supply
- ► Competent hotline support
- ► Comprehensive educational and training offers
- ► Targeted sales and marketing support
