What drives you, drives us

Bosch technologies are used in most vehicles worldwide. People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated over 130 years of pioneering spirit and expertise in research and manufacturing to achieving this.

We provide the aftermarket and workshops worldwide with modern diagnostic and workshop equipment and a wide range of spare parts for passenger cars and commercial vehicles:

- solutions for efficient vehicle repairs
- innovative workshop equipment and software
- one of the world's most comprehensive ranges of new and exchange parts
- large network of wholesale customers, for quick and reliable parts supply
- competent hotline support
- comprehensive educational and training offers
- targeted sales and marketing support

The solution for connected workshops:

Bosch Connected Repair

Quick, easy, connected:

Increase efficiency in your workshop with Bosch Connected Repair

Within the workshop there are devices and services that need information. Data about the customer, about the vehicle, about the fault, or the required service. All of these systems communicate with the user – but not with each other. Bosch Connected Repair (CoRe) is the convenient solution: a software that connects workshop equipment, vehicle and repair data.

Whether for faults or saving data and images in accordance with the General Data Protection Regulation – CoRe has been adapted to meet our customers' every need, ensuring you remain competitive.

Your benefits at a glance:

- SAVE TIME**
 Vehicle identification is performed once and then transmitted to all connected devices. At 30 seconds per vehicle, this adds up to a time saving of several hours each year.
- STREAMLINE PROCESSES**
 Test protocols, comments, and images are saved directly to the digital job card and can be accessed at any time.
- INCREASE EFFICIENCY**
 All employees can easily access the digital job card and the vehicle status at any time. Typing errors are reduced to a minimum.
- EXPAND THE RANGE OF FUNCTIONS**
 The measurement results for products from other manufacturers can be attached to an order and benefit from the electronic database.
- BOOST CUSTOMER SATISFACTION**
 A transparent and easy-to-understand final report increases customer confidence.

Up to

Product	Order number
Connected Repair	1 687 P15 076
CoRe Online	1 687 P15 083
CoRe Package	1 687 P15 130

The ESI[tronic] subscription conditions apply to this software. Please contact your local Bosch sales partner to confirm the availability of this software for your region and the subscription conditions.

Simple steps – extensive solutions

Connecting workshop management systems

The benefits of CoRe are already available to every workshop: more than 50 partners around the world currently support CoRe connectivity. Contact your DMS provider to find out more.

Quick vehicle identification

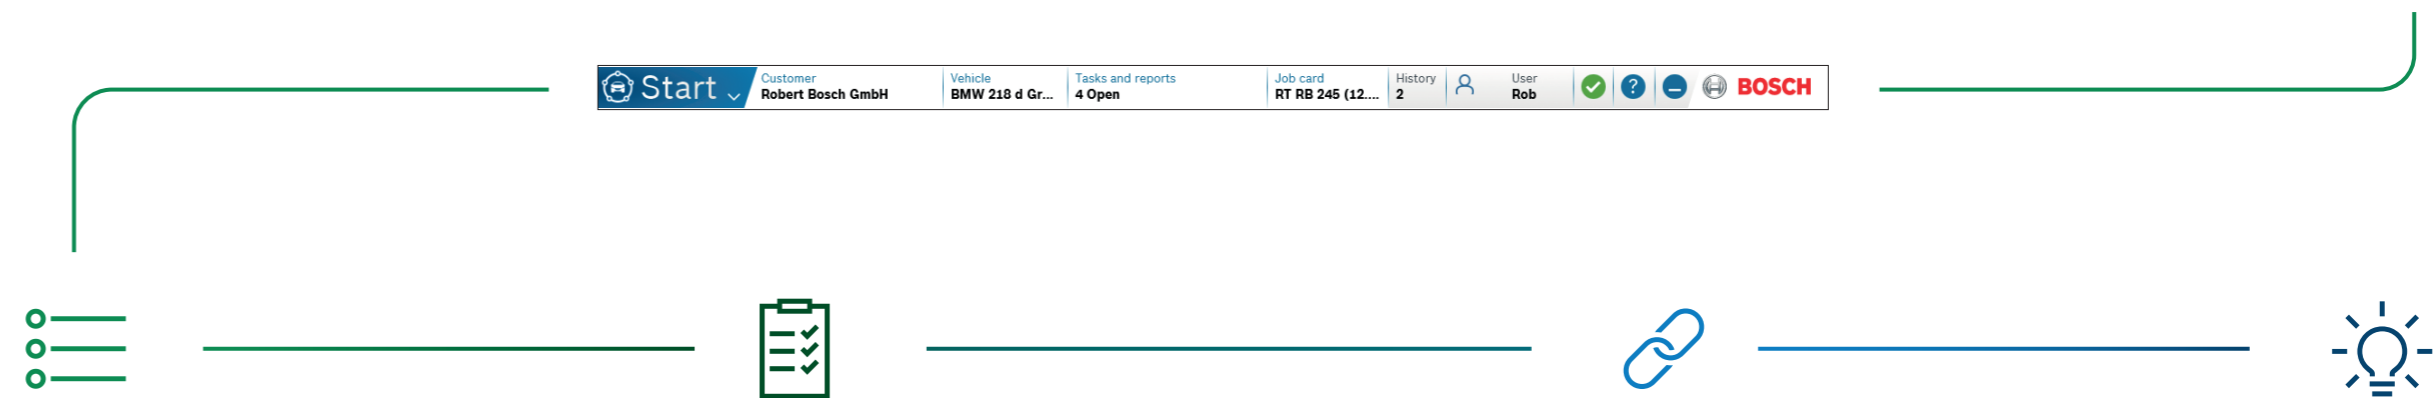

New search algorithms in conjunction with flyout menus facilitate and accelerate vehicle identification. Identification, using different characteristics (such as VIN, DVLA, and country code), can be directly read out of the vehicle.

Integration of images with the PictureApp

Images taken on mobile devices can be easily included and commented in the digital job card. The PictureApp facilitates the connection of tablets and smartphones, making it simple to take and integrate photos.

Detailed vehicle history

Vehicle information from previous visits is stored and easy accessible. Even PDF files from external systems (e.g. vehicle reports from other manufacturers) can be included, thus rounding out the customer's vehicle history.

Reviewing progress

The service manager can view the status of the digital job card at any time, and all employees can access the jobcard at any time using any of the connected devices. The integrated e-mail function enables information such as job cards, pictures, and tasks to be sent directly to the customer.

Extensive documentation

All individual test results can be displayed in either individual reports or in summarized form. A personalized version of the report with an individual company logo is also possible.

Connection with Workshop-Net

Jobs distributed in the workshop by Workshop-Net can also be completed using integrated products. That means many workshops can immediately start using some of CoRe's benefits.

Connectable in many ways

Not only Bosch products use CoRe: products from third-party manufacturers (using an up-to-date Windows version) can also submit measurement results to CoRe and benefit from the electronic database.
