

Invented for life

BOSCH

Easy breathing for allergy sufferers

Bosch cabin filters

Protection for young and old allergy sufferers

Bosch cabin filters

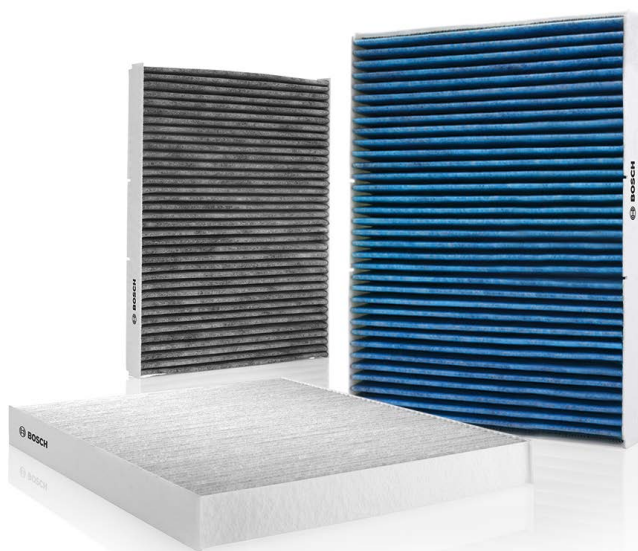

Watery and itchy eyes along with sneezing are rather unpleasant aspects of spring for a lot of people suffering from pollen allergies. These allergic reactions are particularly annoying when driving a car. Fine dust and exhaust gases of preceding cars, however, can be equally burdening – especially for kids. In these cases, Bosch cabin filters can provide relief. Allergens, bacteria and fine dust are efficiently trapped before reaching the inside of the car.

Bosch – a strong partner for cabin filter businesses

- Complete range consisting of more than 650 filters from a single source
- Market coverage of 97 %
- Updated product range with approximately 40 new releases each year
- High availability of goods – in more than 100 countries worldwide

Bosch cabin filters protect the most valuable parts of the vehicle: driver and occupants. In return, no compromises can be made concerning their product quality. Every Bosch cabin filter features high-quality materials, top processing and technical know-how.

Increasing health consciousness and a risen awareness for topics such as fine dust and allergies among the drivers highlight cabin filters ever more – use your chance and benefit from this additional business!

? Did you know ?

Allergies are on the rise. Approximately

25%*

of the European population suffer from pollen allergies.

Workshop tip

Bosch recommends to change cabin filters every 15,000 km or once a year.

Possible consequences of silted-up filters:

- Poor vision due to misted windows, and thus reduced safety
- Increased concentration of pollutants inside the vehicle
- Allergic reactions, e.g. sneezing
- Restricted operation of the air conditioning system due to deposits on the evaporator

FILTER⁺pro cabin filters

Product details

Bosch FILTER⁺pro effectively combats viruses, bacteria, mold, and fine dust, and neutralizes allergens and harmful gases. For the best possible air quality in the vehicle interior and high health protection for the occupants.

Advantages at a glance

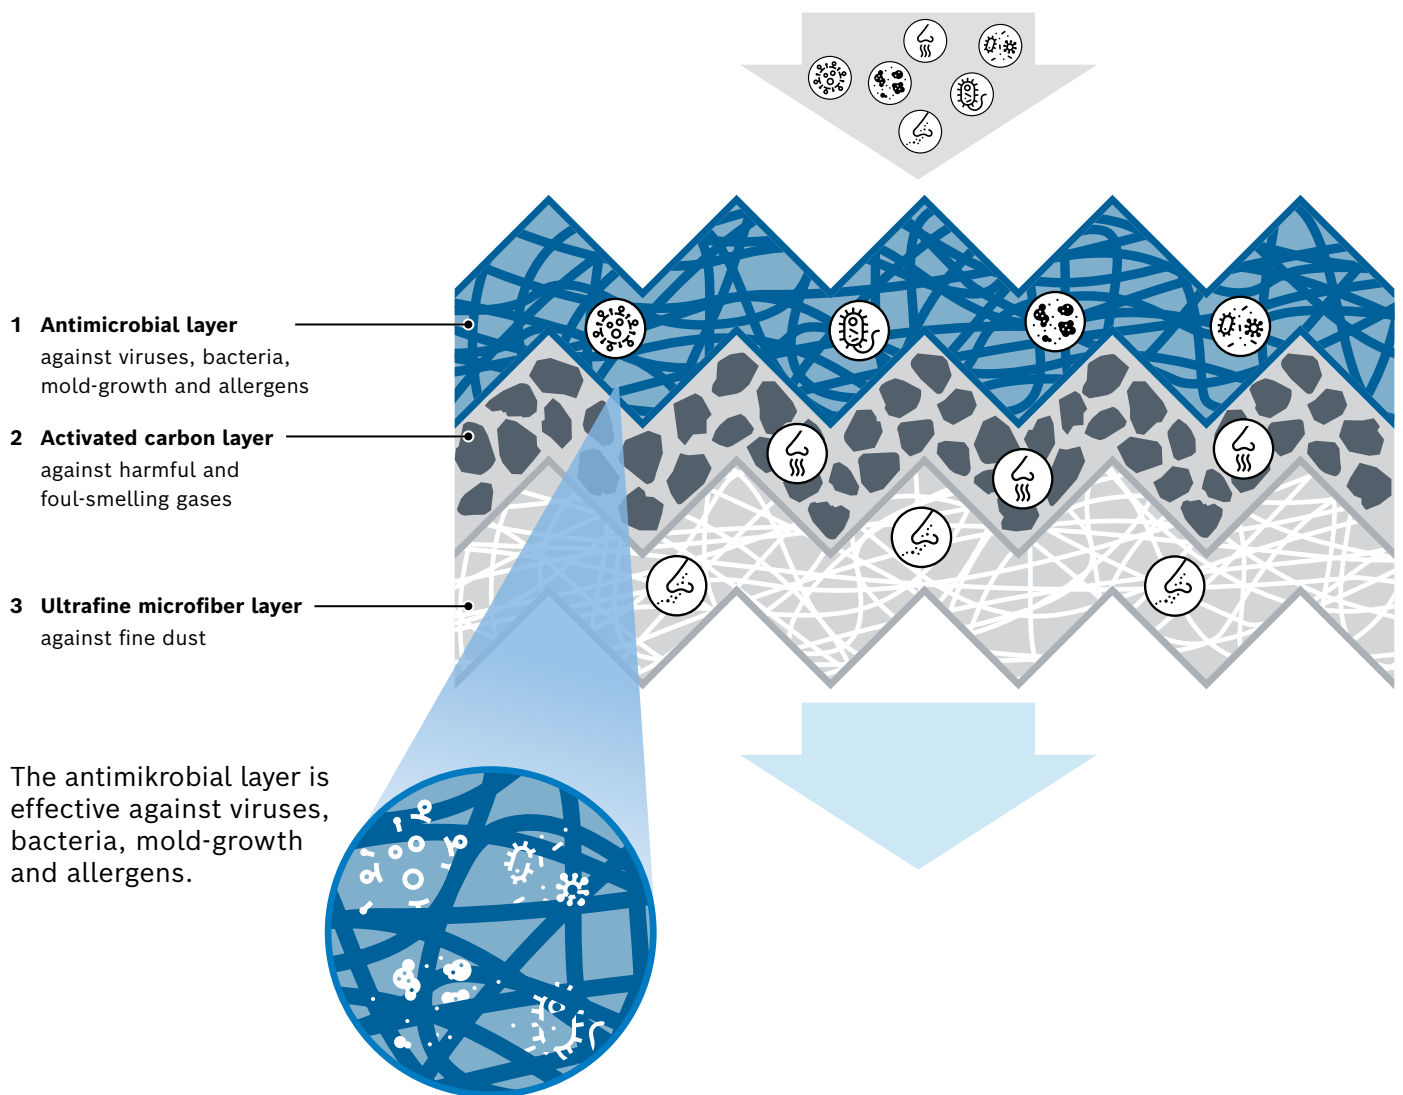

- **Effective against viruses and bacteria** and prevents mold growth through a special antimicrobial layer
- **Permanently binds allergens and pollen** in the filter fleece
- **Highly efficient filters over 98% of all fine dust particles (particle size up to 2.5 µm)** in an ultra-fine microfiber layer
- **Neutralizes reliably harmful and foul-smelling gases** in an activated carbon layer
- **Protects the air conditioner and improves the vision** by reducing deposits
- **Included installation manual** for selected vehicle models

Practical packaging

- FILTER⁺pro function and benefits neatly explained for end consumers
- Including short code, part number, applications and EAN code
- Installation instructions included
- High stability for a reliable protection of cabin filters during transport and warehousing

FILTER⁺pro cabin filters

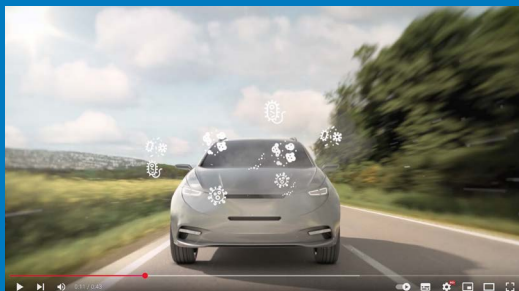

Technology

The antimicrobial layer is effective against viruses, bacteria, mold-growth and allergens.

Activated carbon cabin filters

Product details

Bosch activated carbon cabin filters – for noticeably purer and more pleasant air inside the car.

Advantages at a glance

- **Neutralizes reliably harmful and foul-smelling gases** in an activated carbon layer
- **Filters effectively fine dust, soot and pollen** in an ultrafine microfiber layer
- **Protects the air conditioner and improves the vision** by reducing deposits
- **Included installation manual** for selected vehicle models

Did you know?

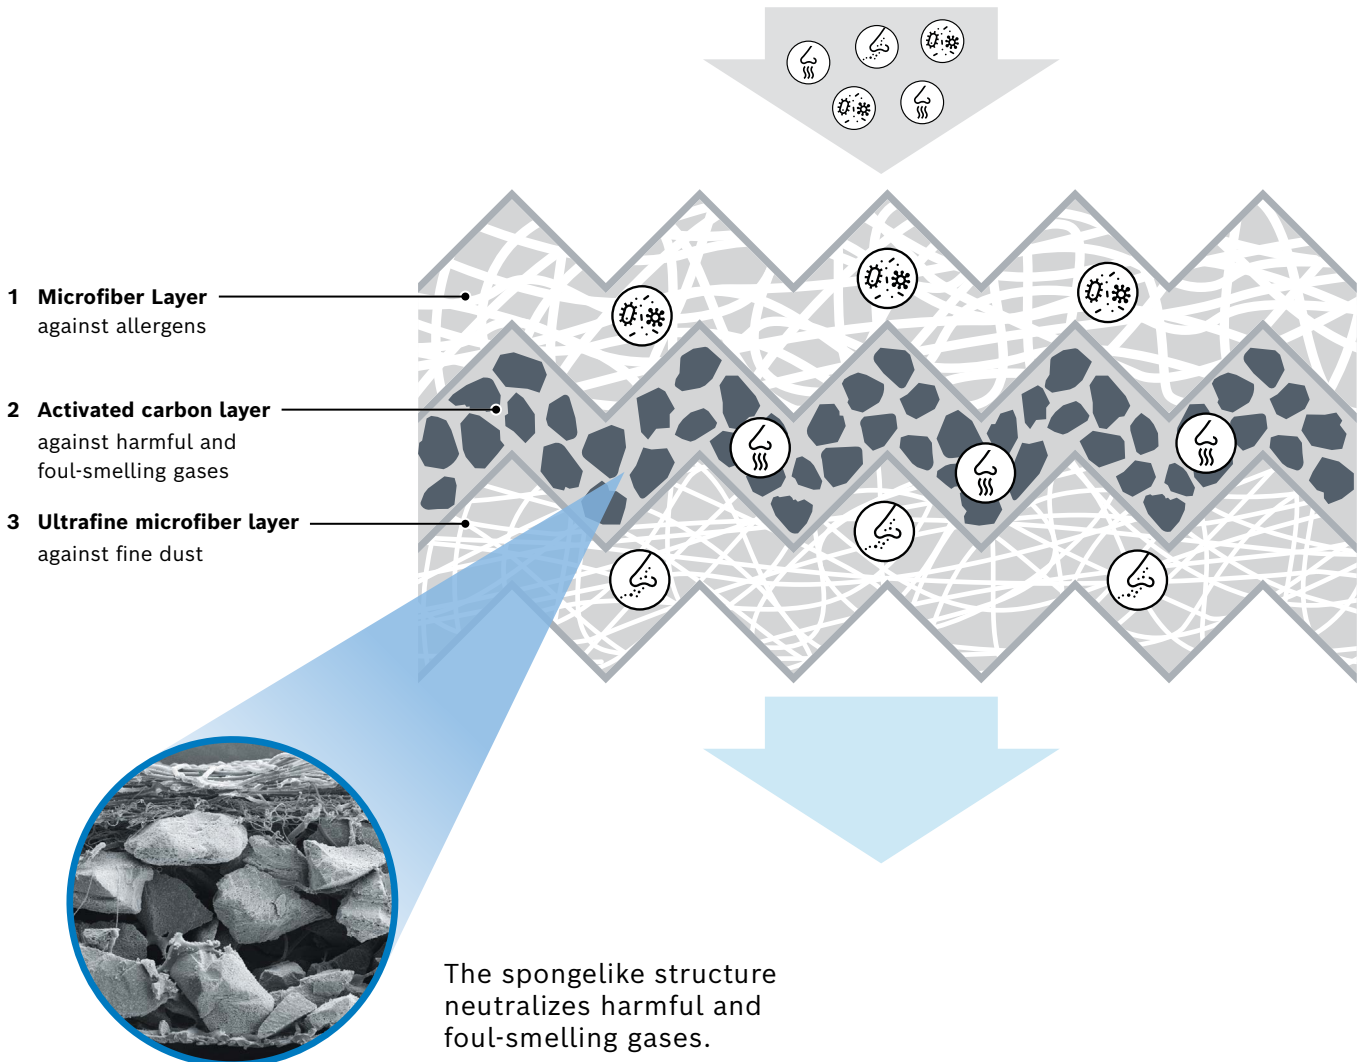

One gram of activated carbon has an internal surface of approximately

1,000 m²

A teaspoon of activated carbon thus has the same surface as a whole soccer pitch.

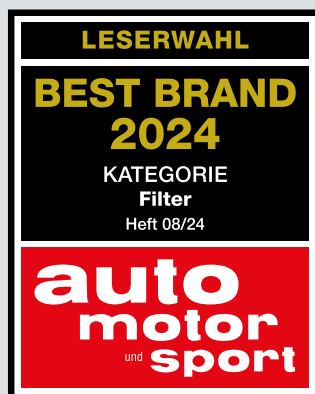

Activated carbon cabin filters

Technology

Best Brand 2024

The readers of the German automobile magazine “auto, motor und sport” voted Bosch the best brand in the Filters category.

„auto motor und sport“,
edition 08/2024

Did you know?

Activated carbon is made of coconut shells carbonized and crushed in a hermetically sealed environment. Water vapor with a temperature of

800° C

is used to create its sponge-like structure.

Standard cabin filters

Product details

Bosch standard cabin filters – for clean air inside the car.

Advantages at a glance

- **Filters effectively fine dust, soot and pollen** in an ultrafine microfiber layer
- **Protects the air conditioner and improves the vision** by reducing deposits
- **Included installation manual** for selected vehicle models

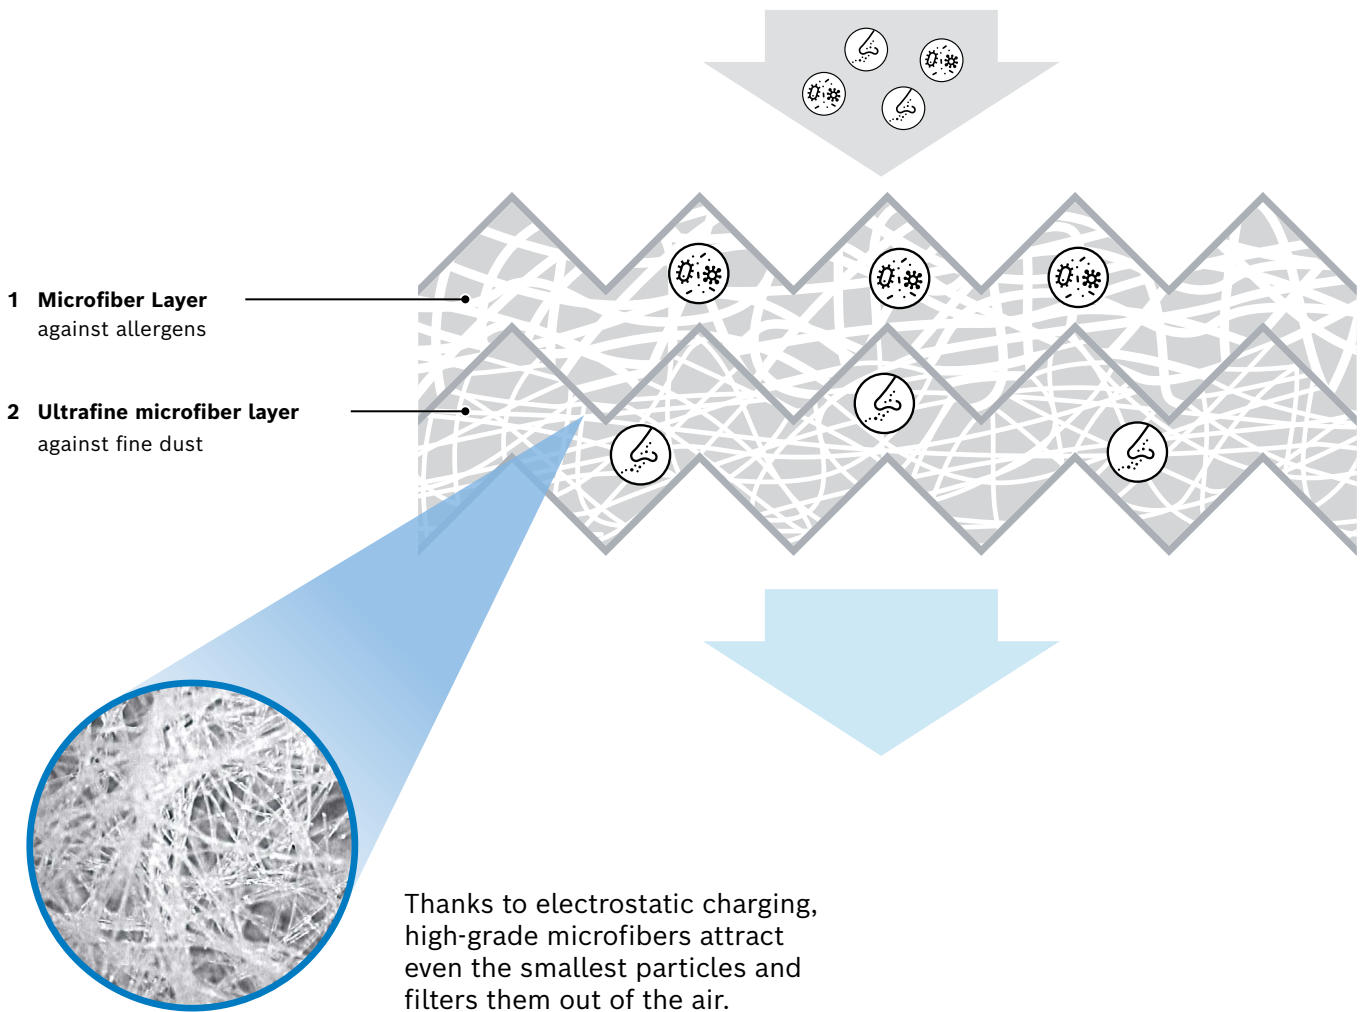

Did you know?

A special embossing of the filter media increases the stability and the surface of the filter.

Standard cabin filters

Technology

Workshop tip

Bosch air conditioning service units for R134a and R1234yf simplify work processes in the workshop

- The Deep Recovery function increases the refrigerant recovery rate to up to 99% and reduces maintenance time*
- Maintenance-friendly design for easy and efficient access to the internal components of the air conditioning service unit
- The smartphone app makes it possible: remote control of the air conditioning service unit at the touch of a button
- Integrated leak detection for inert gas (NOx, nitrogen, forming gas)

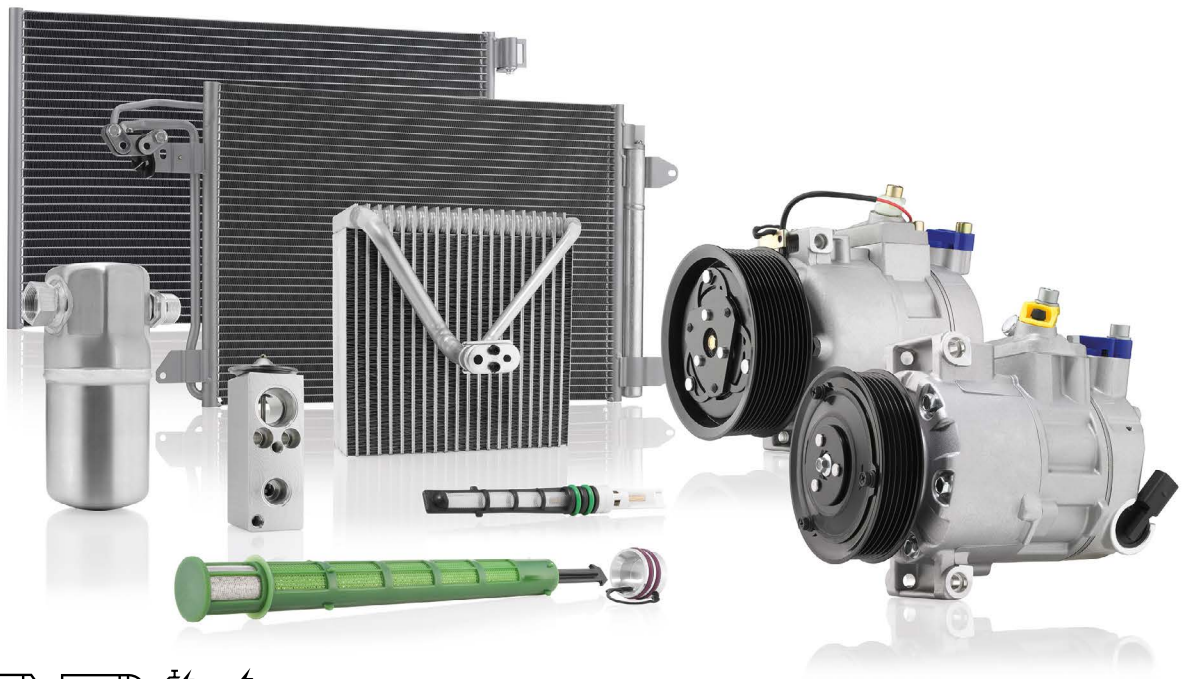

*ACS 863, ACS 763, ACS 753, ACS 663 and ACS 653

A/C components

Product details

With its extensive program, Bosch is already a competent and reliable partner for the workshop when it comes to maintaining A/C systems. Beside the fully automatic ACS service units, the Bosch spare parts range also includes A/C compressors and condensers, dryers, expansion valves and evaporators, to support workshops in the case of repairs.

Advantages at a glance:

- **Reliable performance and long service life** through rigorous endurance and leak tests based on Bosch's high quality standards
- **Easy to install** thanks to precisely fitting connections and compressors prefilled with oil
- **Comprehensive installation assistance** through multilingual installation instructions

Cabin filter

For the best possible air quality in the cabin, every AC service should **include replacing the cabin filter.**

What drives you, drives us

Bosch technologies are used in most vehicles worldwide.
People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated over 130 years of pioneering spirit
and expertise in research and manufacturing to achieving this.

We provide the aftermarket and workshops worldwide with modern diagnostic and workshop
equipment and a wide range of spare parts for passenger cars and commercial vehicles:

- solutions for efficient vehicle repairs
- innovative workshop equipment and software
- one of the world's most comprehensive ranges of new and exchange parts
- large network of wholesale customers, for quick and reliable parts supply
- competent hotline support
- comprehensive educational and training offers
- targeted sales and marketing support
