

Invented for life

**BOSCH**

# Fresh air for all engines

Bosch engine cooling fans

# Engine cooling fans

## Overview

Profound knowledge of the complete vehicle thermal system and decades of experience in development and production make Bosch a reliable partner for anything related to engine cooling systems. The engine cooling fans and complete modules offered to workshops are subject to tough functional and quality tests. Workshops rely on Bosch quality.

### Engine cooling in line with the demands

Bosch engine cooling fans cause a reliable air flow across the radiator. This prevents the vehicle engine from overheating and potential damage to its components. Especially in case of low speeds or even in idling, engine cooling needs to be perfectly tuned to the respective vehicle engine.

### Wide power range

Bosch provides a highly versatile engine cooling program for any output range. This includes single fan modules providing from 70 to 650 W and double-fan modules providing from 500 to 1,300 W.

### Workshop-friendly

Bosch engine cooling fans are adapted to the respective vehicle type. This ensures quick and easy re placement at the workshop whenever repairs are required.

# Engine cooling fans

## Product details

Bosch engine cooling fans reliably ensure air flow across the radiator thus preventing the vehicle engine from overheating – even at low speeds. The comprehensive range comprises high-quality engine cooling fans and complete modules.

### Advantages at a glance

- **Long service life** due to use of high-quality materials
- **Proven quality** thanks to rigorous standards in production and testing
- **Low-noise operation** due to accurate matching with the respective vehicle
- **Low failure rate** thanks to robust design
- **Increased functional reliability** due to protective functions integrated into the electric drive; for example automatic shutdown in case of any obstructions, thermal fuse and reverse polarity protection

### Workshop programm for thermal management

Thermal management components are becoming more and more important for workshops due to increasing electrification.

# What drives you, drives us

Bosch technologies are used in most vehicles worldwide.  
People, and assuring their mobility, is what we are focused on.

Therefore, we have dedicated over 130 years of pioneering spirit  
and expertise in research and manufacturing to achieving this.

We provide the aftermarket and workshops worldwide with modern diagnostic and workshop  
equipment and a wide range of spare parts for passenger cars and commercial vehicles:

- solutions for efficient vehicle repairs
- innovative workshop equipment and software
- one of the world's most comprehensive ranges of new and exchange parts
- large network of wholesale customers, for quick and reliable parts supply
- competent hotline support
- comprehensive educational and training offers
- targeted sales and marketing support
