

Aerotwin package with eco-friendly cardboard tray

100% plastic-free and recyclable

Starting immediately, Aerotwin wiper blades from Bosch are available with a new, environmentally friendly tray that secures the blades and protects the wiping edge. This tray is now no longer made of plastic, instead, it consists of a wood-fiber-based material derived from sustainably managed forests. This results in significantly lower CO₂ emissions. All parts of the wiper packaging can be disposed of and recycled together with waste paper. This means a reduced environmental footprint and easier waste segregation in the workshop or at home.

	Black Blister	Cardboard tray
		
Raw material	Fossil fuel (oil, non renewable)	Wood from sustainably managed forests near the factory (renewable)
Recycling Code	Polyethylene terephthalate (PET) PET is a thermoplastic 	Non-corrugated cardboard from wood fiber 
Disposal	Separate disposal of packaging and plastic tray required	Packaging and cardboard tray disposed of together
Biodegradable	No	Yes

NEW

Did you know?

By switching to the new, environmentally friendly packaging, each year more than

350 tonnes plastic are saved.

A great example of a sustainable packaging solution!
