

Tips and tricks for replacing wiper blades

If streaks and smears appear on the windshield during wiping or a squeaking noise can be heard, it is high time to replace the wipers. Bosch wipers are easy to mount. These tips and tricks let you do it in a jiffy!

Step by step instructions

1.

Find the right wiper blades for your vehicle here:
www.boschwiperblades.com

2.

Place the wipers in **service position**.

Consult your vehicle's manual for detailed instructions on setting the service position.

3.

Fold up the wiper arms and remove the old wiper blades.

Caution: *If a raised wiper arm strikes the windshield hard, there's a risk of damage.*

Tip! *Place a cloth or piece of cardboard between the glass and wiper arm for protection.*

4.

Follow the installation instructions:

You'll find them printed on the back of the package or as enclosed instruction inside it.

Would you prefer to watch an installation video?

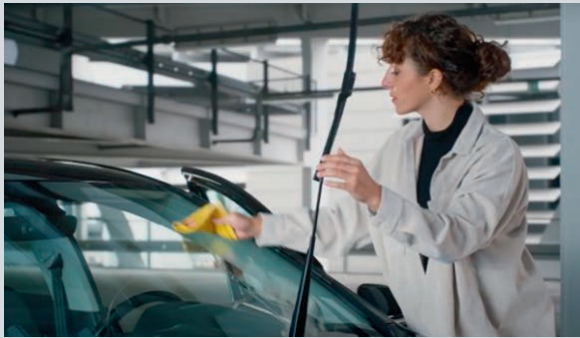

No problem! Just scan the QR code on the back of the package.

5.

Install the new Bosch wiper blades.

6.

Before folding back the new wiper blades, first clean the windshield.

7.

Now place the wiper blades back on the windshield and move them back to the rest position if necessary.

The wiper blades are now ready to go – have a good trip!
