

A good choice for workshop customers

Bosch offers high-quality spare parts for an affordable price: The Bosch eXchange program for common-rail systems enables you to repair vehicles in Bosch quality, economically and cost-effectively.

Overview of advantages

- ▶ Price advantage over comparable products in the new product program
- ▶ Economical repair also for older vehicles
- ▶ High functional reliability and long service life
- ▶ Product improvements to original parts are also incorporated into the exchange product
- ▶ Short downtime and repair time thanks to ready-to-install Bosch eXchange products
- ▶ Contribution to the fulfillment of the legal emissions standards
- ▶ Same warranty as in the new product program

? Did you know?

Bosch features more than

50 years

of experience in remanufacturing of automotive parts. The first distributor pumps were remanufactured back in 1971.

Our contribution to environmental protection

The re-use of cores is an important contribution to sustainable use of resources.

Bosch eXchange common-rail return criteria

AA/XX F xxx Pxx 2020/10 Subject to technical and program changes

The return of used common-rail parts **made easy**

Clear and transparent criteria combined with the simple Back-in-Box method enables straightforward and quick core handling.

Return criteria

- ▶ Readable manufacturer part number for the core identification (original on product/box)
- ▶ The core
 - ... is listed in the exchange assortment
 - ... must be complete
 - ... must not be disassembled or severely damaged
- ▶ A corresponding Bosch eXchange product was previously purchased by you

If these criteria are met, the deposit value will be refunded.

Simple return thanks to Back-in-Box

1. Delivery of a new product
You receive your new eXchange product from Bosch.

2. Installation
You exchange the used product for the new one.

3. Return
You return the core within the original Bosch eXchange packaging.

Advantages with Back-in-Box

- ▶ Securing your deposit refund provided the return criteria are met
- ▶ Transport protection of the core during return shipment
- ▶ Fast processing thanks to easy identification of the core
- ▶ No disposal of the packaging necessary
- ▶ The core should not be soiled

Return criteria

✓ Acceptable condition
