

Bosch filters

Special filters for heavy commercial vehicles

Reliable Bosch special filters for heavy commercial vehicles

Commercial vehicles make money every day. Their operation is a constant race against the clock. Operators seeking to avoid expensive downtimes don't make any compromises and thus rely on Bosch commercial vehicle filters.

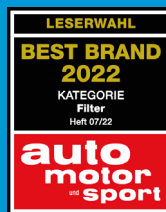

The comprehensive range of Bosch filters is continually updated. Bosch provides the right solution for commercial vehicles, even for special applications and different functionalities.

This applies to the Bosch Denox filters, protecting the exhaust-gas treatment systems, the Airdryer filters involving compressed air systems or the Hydraulic filters cleaning the hydraulic oil which protects many systems like the hydraulic, transmissions and steering systems. There are also others filters types such as oil mist separators, coolant filters, centrifugal oil filters, secondary air filters, special fuel filters for preliminary filtration and dedicated cabin filters for roof mounted air conditioning used particularly on some buses applications.

Bosch advantages at a glance

- ▶ Comprehensive portfolio and continuous range extension
- ▶ Parts, Diagnostics and Workshop Services: Workshop solutions
- ▶ Filter system competence: manufacturer leader in diesel systems and exhaust gases systems - Denoxtronic
- ▶ Outstanding filter performance according to the OE product quality
- ▶ Marketing and Loyalty tools e.g. eXtra and workshop concepts
- ▶ Strong recognized brand

Did you know: Bosch Filter was voted in 2022 as Best Brand for the 17th time in a row!

("auto motor und sport", edition 07/2022)

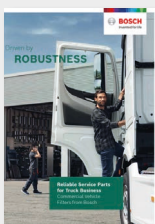

Purpose of special filters

Protect the engine and all components around as well as protect other relevant systems e.g. fuel injection, exhaust-gas treatment, coolant, hydraulic, transmissions etc.

Change filters regularly as specified by the vehicle manufacturer!
