Take your workshop to the next level

with ESI[tronic] Evolution

Faster, simpler, clearer

To ensure that the changes fit in well with your day-to-day work, the changes are developed in packages and incorporated into ESI[tronic] bit by bit. This way, you can familiarize yourself with the new design one step at a time, gradually find out about improvements and still benefit from them even faster – a real evolution.

ESI[tronic] EVOLUTION

The Evolution begins!

With the 2024 | 1 update, the globally proven ESI[tronic] 2.0 Online diagnostic software has been completely revised and expanded to include various new functions. It will not only be faster and simpler, but also more user-friendly and clearer.

ESI[tronic] 2.0 Online becomes ESI[tronic] Evolution

In addition to the new features, the update also comes with a new name: ESI[tronic] Evolution. As an ESI[tronic] user, you can look forward to exciting innovations that will make your day-to-day work in the workshop much easier.

ESI[tronic] Evolution provides quick, easy and user-friendly access to available data and functions. The new start screen gives users easy and direct access to main menus and submenus. The new intuitive design of the start screen provides a better overview and can be customized to suit individual needs. ESI[tronic] Evolution also enables direct access to original documents from various manufacturers. In addition, the Bosch Connected Repair Cloud network solution is integrated directly into the start screen, enabling all workshop devices to be connected and tasks to be processed directly on the start screen.
