

## **Bosch brake pads and discs:** a single and complete range that covers both ICE and electric & hybrid vehicles

2021 has brought a historic increase of the electric and hybrid vehicles registrations accounting for almost 38% from overall new passenger cars in the EU. Therefore, these vehicles play an important role not only for the owners but for workshops as well.

In this respect, featuring an european market coverage for pads (top european EV & HEV) of up to 90%, Bosch is ready to serve the workshops with one complete and available range of brake pads and discs, suitable not only for ICE vehicles but as well for electric & hybrid ones.

The quality requirements without compromises, applies to all Bosch products no matter if the application is a combustion or an electric/hybrid vehicle. Top braking performance is achieved by selecting premium materials and consistent testing of the parts.

### **Brake pads advantages at a glance:**

- ▶ Premium noise and judder behavior: through anti-vibration plates, chamfered edges
- ▶ Safe and reliable: Bosch tests exceed all statutory requirements
- ▶ Consistent brake performance even under high loads: ensured by a stable friction value
- ▶ Comfortable and good pedal feel: ensured by high compressibility
- ▶ Easy to manage for workshops: 1 PN covering applications with combustion engines and electric/hybrid applications
