# **Bosch QualityScan**

Verifiable Bosch quality  
thanks to repair ID labels

Quality is our number one goal. That is why we and our customers must be able to verify it at all times.

As authorized Bosch diesel specialists, we repair common-rail injectors and injection pumps according to Bosch quality standards and provide access to information about the repair, which can be accessed via a website and an app using a unique repair ID.

The Bosch QualityScan app provides you with a quick overview of all the relevant repair information relating to your Bosch common-rail injectors and Bosch injection pumps.

# The best solution for your needs

As diesel experts, it is our duty to offer you the best solution that suits your needs.

Our commitment to transparency ensures you can verify this at all times – and ensures that the repair is carried out according to Bosch quality standards.

**Clarity:** Presentation of the component data, such as the repair ID, repair date, IMA code, and contact details of the authorized diesel specialist carrying out the repair

**Safety:** Only repaired components that have been tested according to Bosch criteria and that have been found to be in order are stored in the online database

**Transparency:** Ability to precisely trace every QualityScan repair

**Customer loyalty:** Transparent proof of quality by Bosch QualityScan strengthens confidence in the work of Bosch Diesel specialists

# Four steps to quality verification

---

Precise identification is quick and easy

## **Diagnosis and shipping:**

Send the faulty component for repair to an authorized Bosch Diesel Center or Bosch Diesel Service partner

**Repair:** The authorized Bosch Diesel Center or Bosch Diesel Service partner carries out the repair in accordance with Bosch quality standards

2

# 3

**Labeling:** The diesel component is labeled with a repair ID label or clip, and the QR code is subsequently scanned to enter the component data into the database on the QualityScan server

**Accessing repair data:** The information relating to the repair can be accessed using the QualityScan app or via the QualityScan website
